Quick Start Checklist

Quick Start Checklist

This checklist summarizes the complete Getting Started process. Follow each step in sequence to ensure a successful GCXONE deployment.

Phase 1 — Pre-Deployment Requirements

☐ Network requirements verified (internet, ports, DNS)

☐ System requirements confirmed (OS, RAM, storage, display)

☐ Account requirements prepared (corporate email, admin access)

☐ Hardware prepared (device credentials, network information)

Phase 2 — First-Time Login & Access

☐ Registration completed

☐ Email verification successful

☐ Password created according to policy

☐ Initial login successful

Phase 3 — Organization & Hierarchy Setup

☐ Organization details configured

☐ Customer created

☐ Site created

☐ Platform hierarchy validated (Tenant → Customer → Site)

Phase 4 — User Management Setup

☐ Default roles reviewed

☐ Required roles created or modified

☐ Module privileges configured at role level

☐ Entity access assigned (Customer / Site / Device as needed)

☐ Users invited and assigned correct roles

Final Validation

- ☐ User access confirmed
- ☐ Organizational structure verified
- ☐ Device and alarm functionality validated
- ☐ Dashboard displays accurate data
- ☐ No critical errors remain
