Device Installation

Device Installation

Comprehensive guide for device installation.

Overview

This device integrates seamlessly with the GCXONE platform to provide comprehensive security monitoring.

Key Features

- Real-time alarm monitoring
- Video streaming capabilities
- Remote configuration
- Event management
- Health monitoring

Supported Models

- Multiple device models supported
- Various firmware versions compatible
- Scalable deployment options

Integration Benefits

- Centralized monitoring
- Reduced response times
- Improved security coverage
- Streamlined operations

Getting Started

- Review system requirements
- Plan device placement
- Prepare network configuration

- Contact support if needed
