Genie

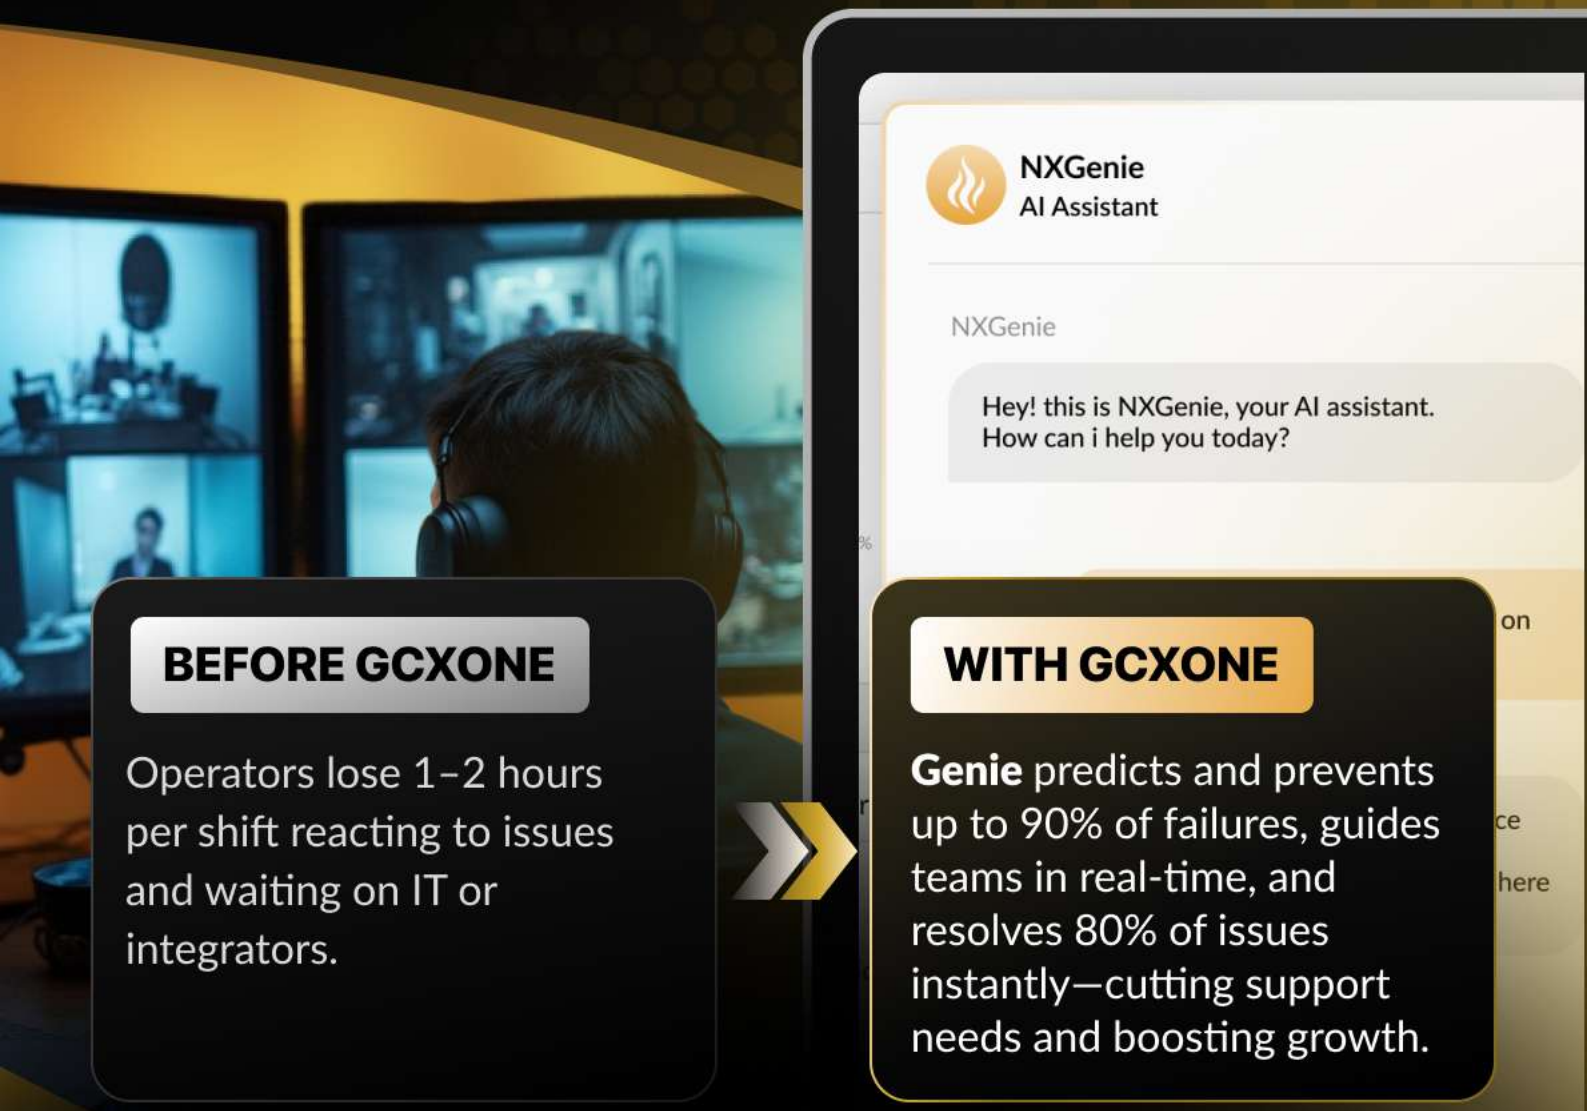
Predict. Resolve. Guide. Your AI Assistant at Work



BEFORE GCXONE

Operators lose 1–2 hours per shift reacting to issues and waiting on IT or integrators.

WITH GCXONE

Genie predicts and prevents up to 90% of failures, guides teams in real-time, and resolves 80% of issues instantly—cutting support needs and boosting growth.

Your Smart Assistant

Meet Genie – the intelligent assistant that transforms security operations from reactive to proactive. By automating routine tasks, Genie saves operators 1–2 hours every day, freeing them to focus on critical events. Administrators see up to 50% of support requests auto-resolved, while IT teams cut tickets in half with real-time troubleshooting feedback that fixes problems at the source. For tower operators, Genie delivers instant access to live stats and faster alarm identification — boosting speed by 40% and eliminating guesswork. Even during setup, Genie accelerates deployment with plug-and-play simplicity, reducing revisits and downtime. The result: a smoother, smarter, and more scalable operation that keeps your team ahead of every challenge.

Just type in the problem and get the fix, no delays, no handoffs, no friction.

Empower Teams. Eliminate Downtime.

With step-by-step guidance and intuitive workflows, **Genie** frees up 1–2 hours per day for your team while enabling support for over 100 additional cameras per shift.

It simplifies complexity, boosts self-sufficiency, and keeps your operations running smoothly, all with less time and effort.

KEY FEATURES

- Predict - Smart suggestions for operators, integrators, and administrators.
- Resolve - Type it in — get the fix. No delays, no handoffs.
- Guide - Step-by-step. Hassle-free.
- Frees ~1-2 hrs/day.
- Supports 100+ extra cameras/shift.

Powering Your Success

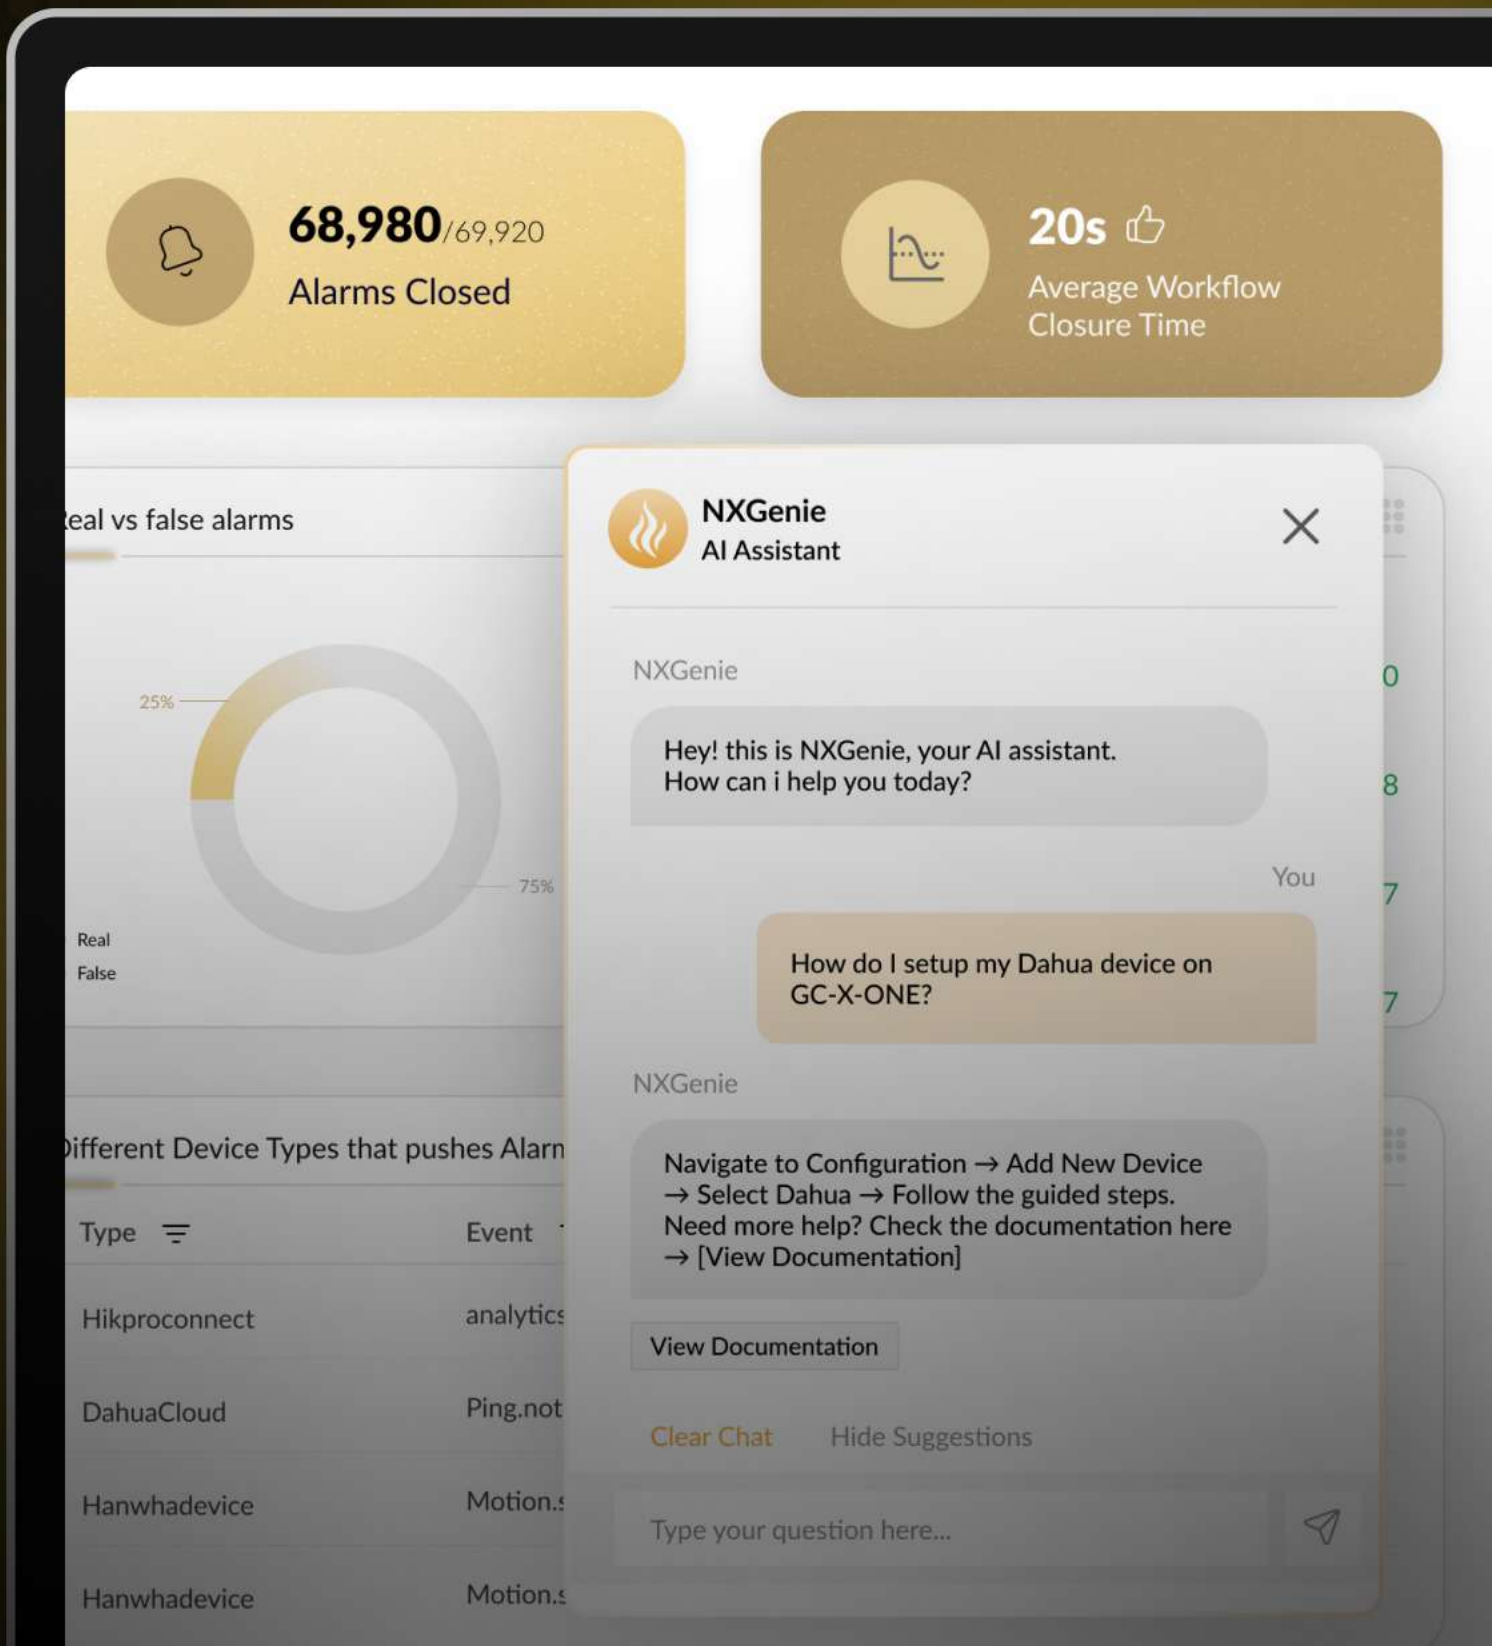
Genie

FREE UP TO **2** HOURS OF MANUAL WORK DAILY

AUTOMATES UP TO **50%** OF SUPPORT REQUESTS

The Breakthrough

Genie revolutionizes efficiency by taking the routine off your operators' plates, saving them 1–2 hours every day and boosting alarm identification speed by 40%. Administrators see up to 50% of support requests auto-resolved, while IT teams cut tickets in half with real-time troubleshooting that fixes problems before they spread. Even tower operators gain sharper context with instant stats at their fingertips. The result: fewer disruptions, faster reactions, and a smarter operation that scales without extra effort.



Stronger Together

Each **GCXONE** breakthrough is powerful on its own — but the real magic happens when they work together. **Zen**Mode filters the noise, **Genie** automates the routine, **Health**Check ensures every system runs flawlessly, and **Time**Sync keeps the entire network aligned. **Bulk**Import accelerates onboarding, while **Custom**View and **Pulse**View put actionable insights at every fingertip. **NOVA**99x delivers unmatched detection, **Tower**Guard strengthens remote response, and **Market**Place expands possibilities with every integration. Combined, these features transform security operations into a seamless, scalable, and revenue-generating powerhouse — giving every role, from operator to general manager, more impact with less effort.

What improvements can we expect in support volume with **Genie**?

With **Genie**, support volume can be reduced by 50–70%. It automatically resolves repetitive issues and proactively prevents disruptions, allowing teams to focus on more critical tasks without being bogged down by constant support requests.
