HealthCheck

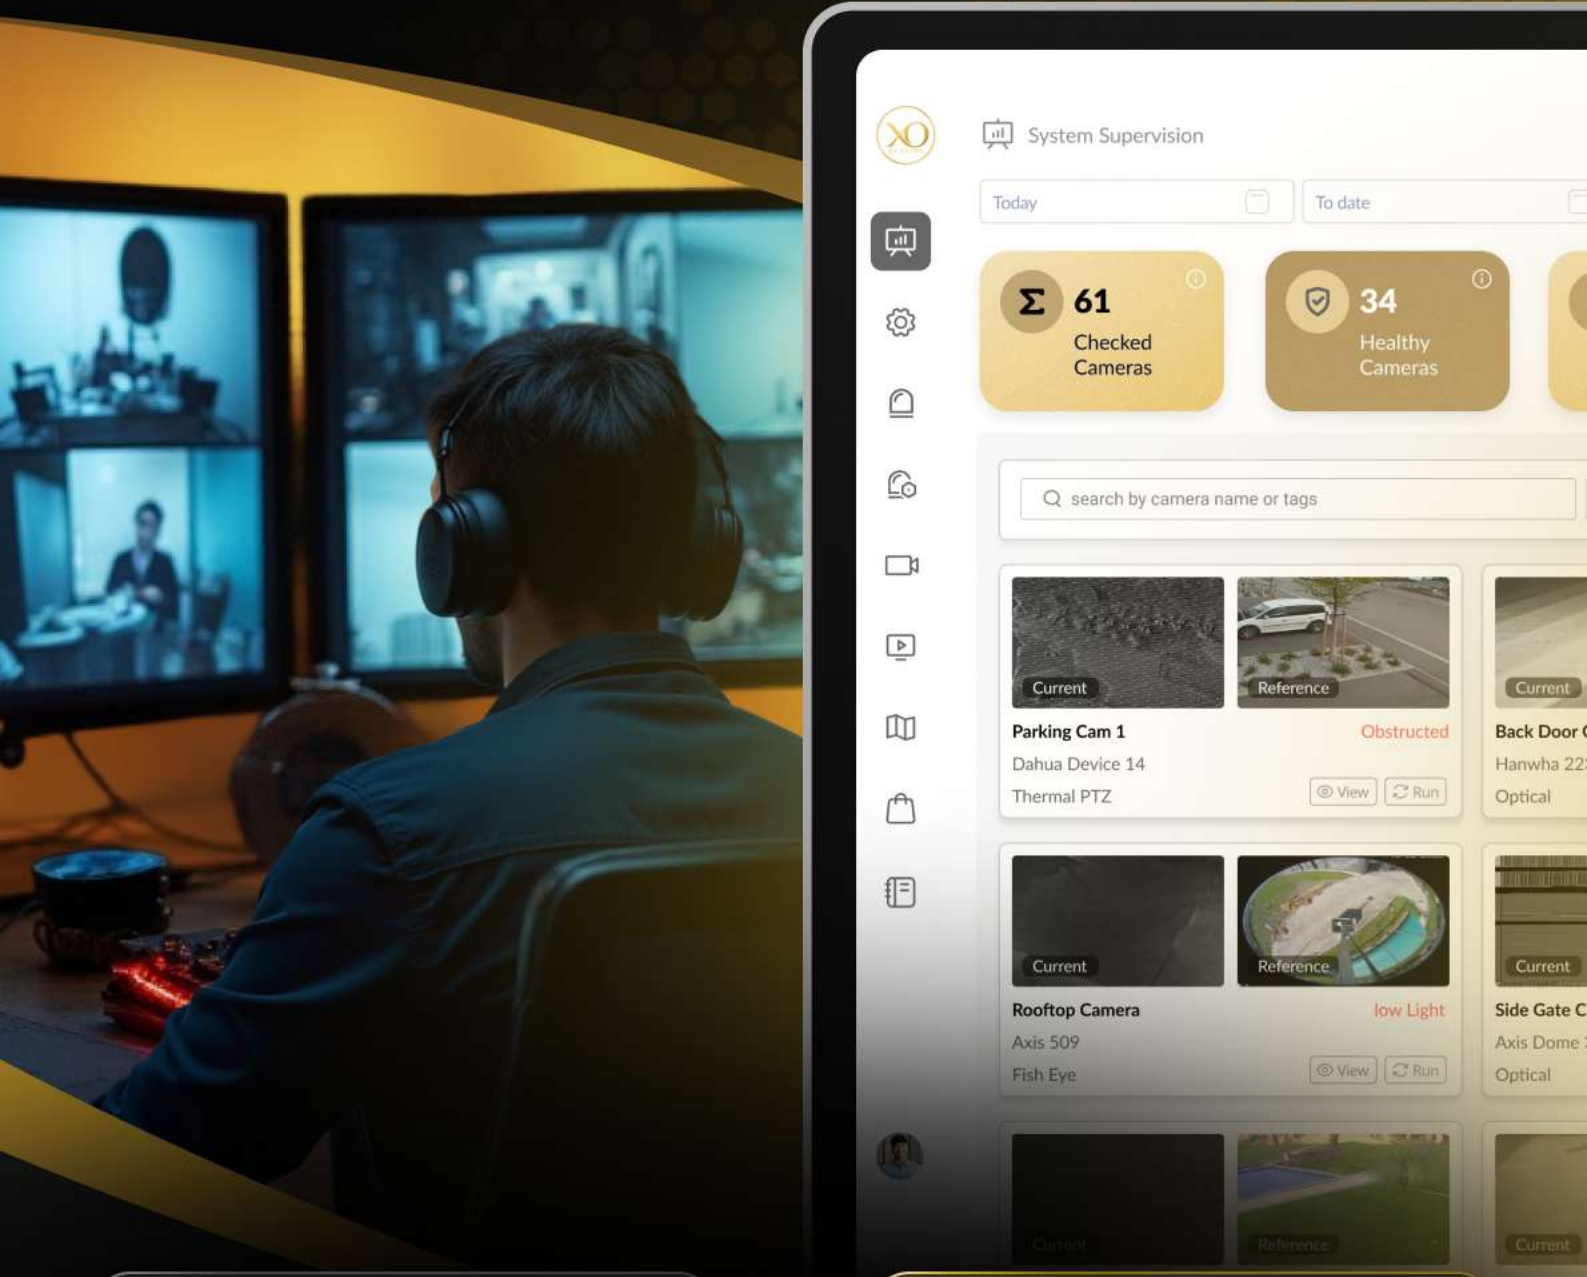
Automated Daily Checks 12x Faster, ZERO Downtime, Eliminate Risks



BEFORE GCXONE

Manual processes, blind spots, and recurring IT tickets slowed every review

WITH GCXONE

Cameras stay at 100% uptime, IT tickets drop by 50%, and teams manage 130+ more sites each month with zero manual effort.

Automate Health. Amplify Results.

This automation frees up more than 65 hours per month, allowing your team to focus on higher-value tasks while maintaining confidence in system performance and reliability.

With **Health**Check, you gain not only time savings but also operational consistency and scalability, all without lifting a finger. It's a smarter, more efficient way to ensure your surveillance infrastructure stays healthy and effective.

KEY FEATURES

- Automated **Health**Check cuts time spent by >90%
- 6 vs 70 Hours per Month for 20k cameras (12x faster)
- Frees up > 65 hours per month
- Completely automated, no operator intervention

Powering Your Success

HealthCheck

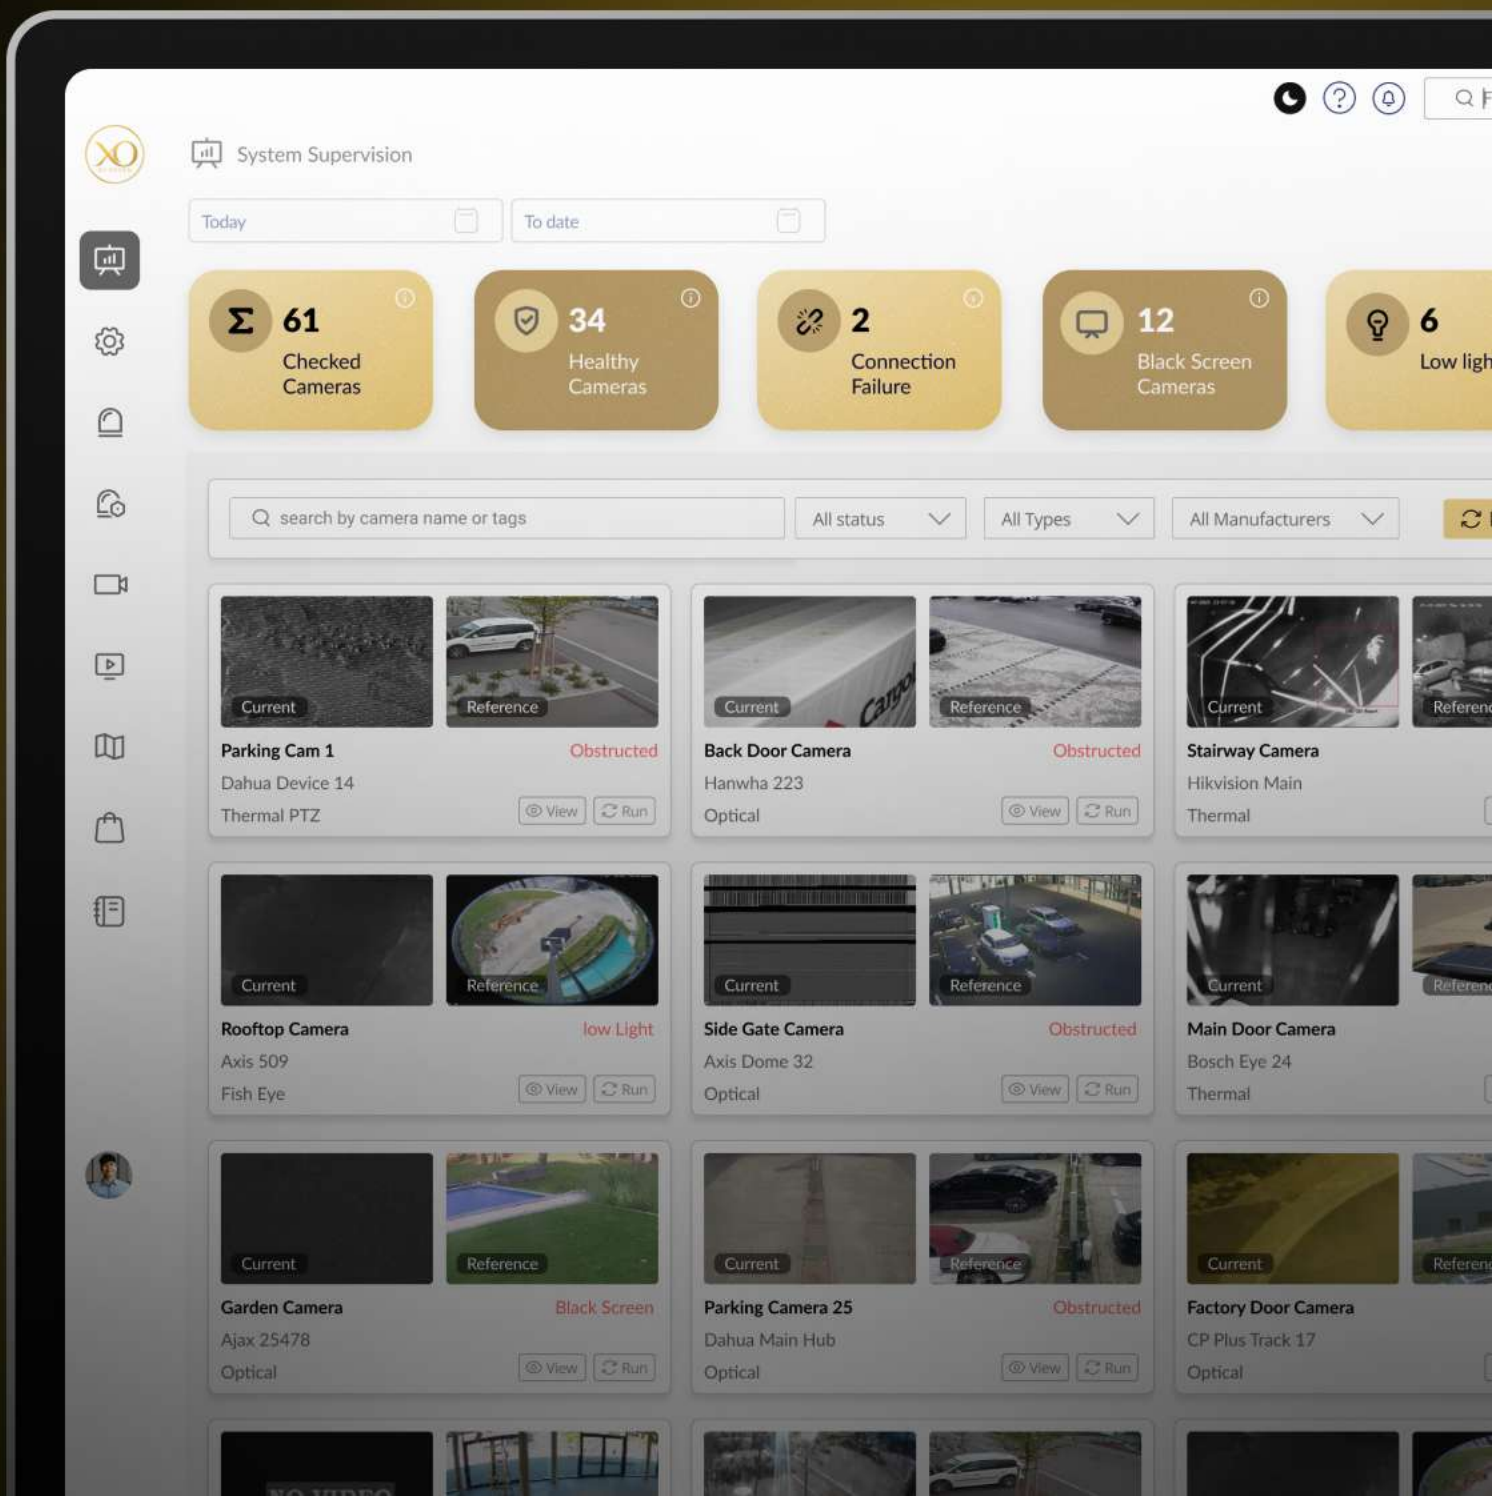
ENSURE **100%** CAMERA UPTIME

SCANS **20K+** DEVICES IN SECONDS

0 MANUAL EFFORT

The Breakthrough

Introducing **Health**Check – the always-on guardian of system integrity. By automating device diagnostics with zero manual effort, **Health**Check ensures 100% camera uptime and eliminates the spreadsheets and guesswork that drag operations down. Operators gain the confidence of verified visuals, administrators get defensible proof for every review, and IT teams see tickets cut by 50% as issues are resolved before they escalate. Even installers benefit, handing over systems with trusted health status every time. With the same team able to manage 130+ additional sites per month, General Managers unlock scale without compromise. **Health**Check turns reliability into growth — making every system smarter, stronger, and legally defensible.



Boost Your **Health**Check Experience with **Genie**

HealthCheck identifies device issues early, but turning insights into action often requires manual follow-up. Genie bridges the gap by automatically handling the majority of device-related queries and guiding teams to the right fix, ensuring **Health**Check insights translate into uptime and reliability.

How quickly can we expect results after implementing **Health**Check?

Most users experience significant benefits immediately, including automated checks across over 20,000 devices, which eliminates hours of manual validation. Say goodbye to spreadsheets and unexpected issues—just seamless validation at scale.
