NOVA99x

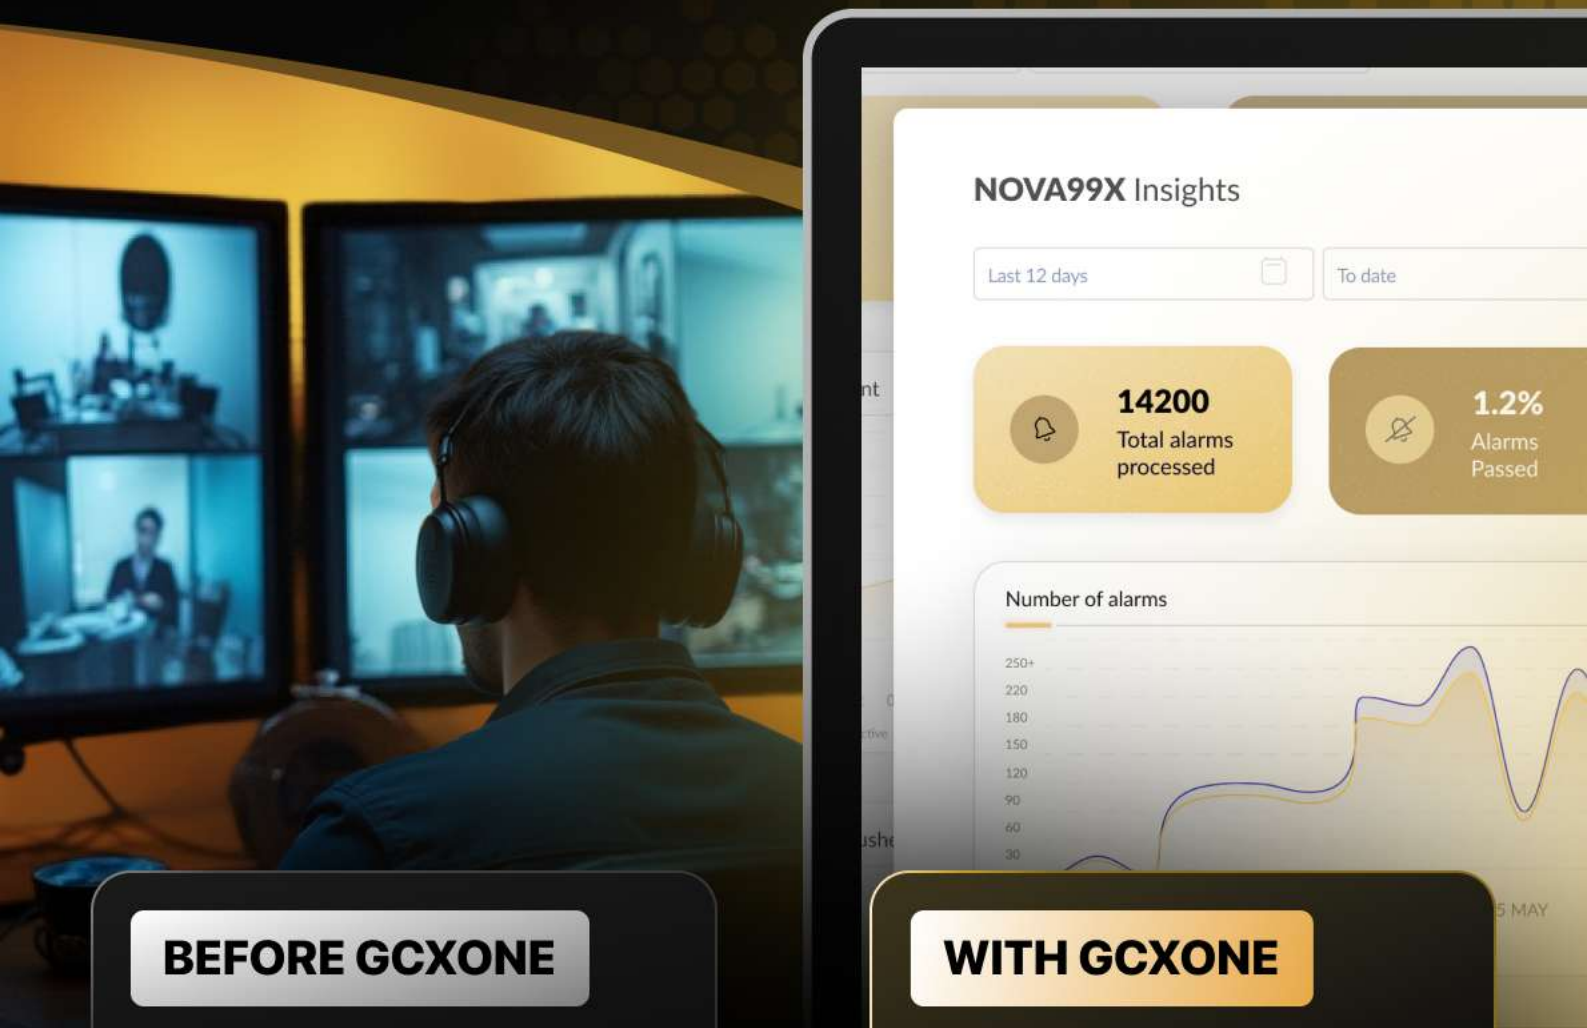
Slash False Alarms by Up to 99% Focus Every Operator on Real Threats



BEFORE GCXONE

Operators lose 4–5 hours per shift to noise, limiting scalability to ~1,000 cameras per operator due to false alarms.

WITH GCXONE

Operators cut through up to 99% of false alarms, freeing 4–5 hours every shift. That efficiency lets teams manage 50% more sites, reduce IT tickets by half, and expand without adding headcount.

A Game Changer

NOVA99x takes the fight to false alarms. By filtering out up to 99% of noise, it gives operators back 4–5 hours every shift and restores clarity during the most critical moments. For administrators, it builds confidence with cleaner data; for IT, it means fewer tickets; and for leadership, it unlocks capacity to expand without adding headcount. With **NOVA**99x, your teams spend time on real threats — not distractions.

Scale Smarter. Save More.

With the capacity to manage over 220 additional cameras per operator per shift, **NOVA**99x empowers your team to scale without increasing headcount.

The result: a 40% increase in productivity per operator and monthly savings of around €10,000. Whether you're looking to boost revenue, reduce operational load, or optimize existing resources, **NOVA**99x delivers clear, measurable performance gains.

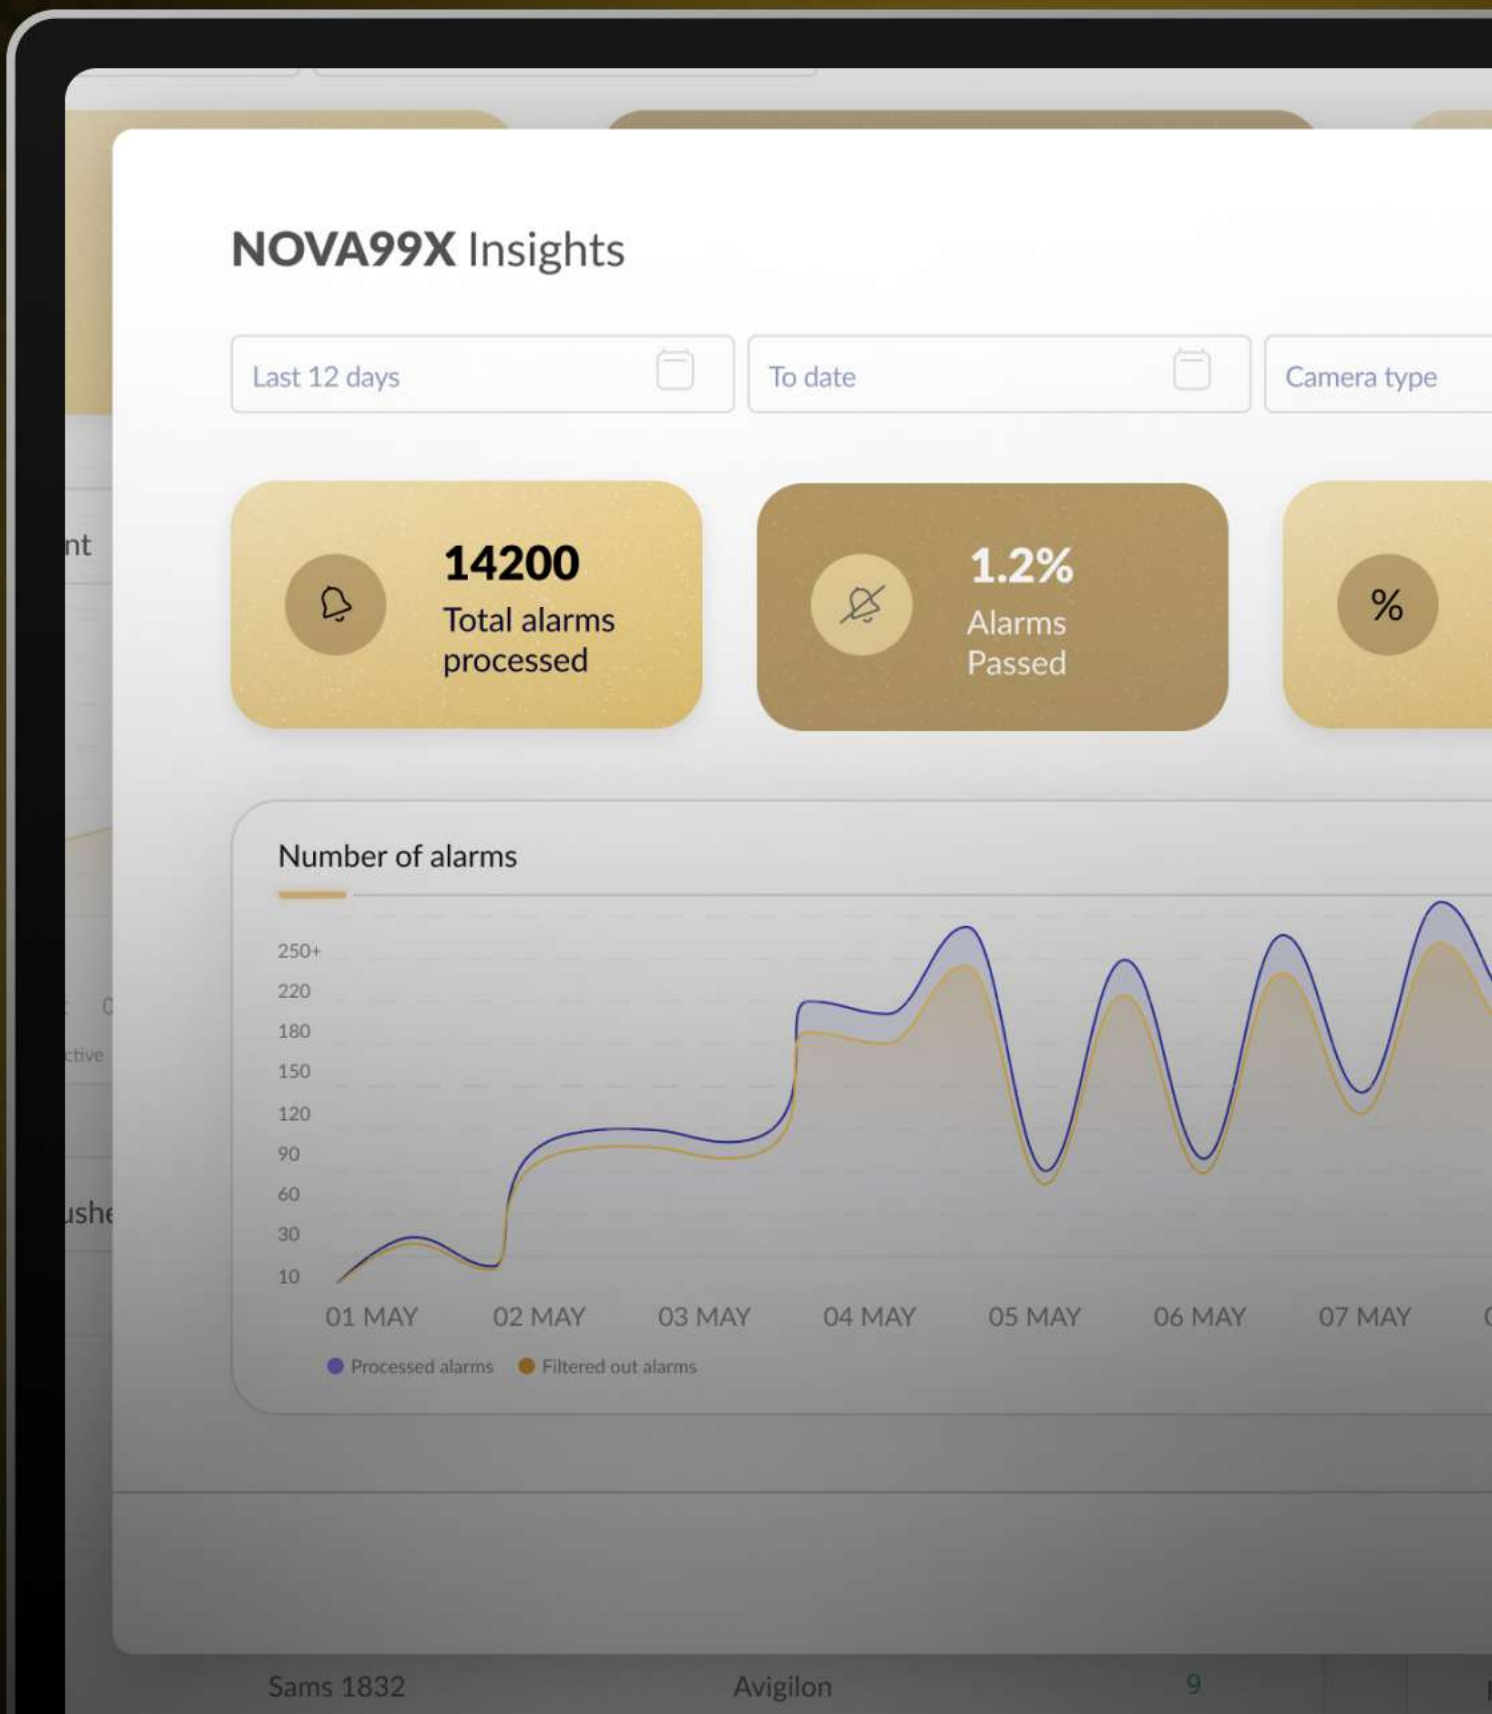
KEY FEATURES

- Filters Up to 99% of false alarms
- Additional 220+ cameras/operator/shift
- Revenue potential: 40% increase per operator which is around €10K overall savings per month

Powering Your Success

The Breakthrough

NOVA99x proves that precision transforms performance. Operators handle 50% more sites per shift, administrators gain audit-ready reports, and IT cuts troubleshooting requests by half. General Managers see efficiency convert directly into growth, while Sales and leadership benefit from a platform that strengthens compliance and reduces risk. **NOVA**99x isn't just a filter — it's a productivity multiplier.



NOVA99x + **Genie**: Zero Noise, Full Focus

When paired with **Genie**, **NOVA**99x becomes unstoppable. **Genie** automates repetitive checks and resolves root causes, while **NOVA**99x eliminates nearly all false alarms. The result: operators stay focused, administrators handle fewer disputes, and IT clears its queue faster. For leadership, it means scalable security operations that run cleaner, sharper, and more profitably than ever.

How does **NOVA**99x help reduce false alarms?

NOVA99x eliminates up to 99% of false alarms. Operators gain back 4–5 hours each shift and manage 50% more sites with confidence.
