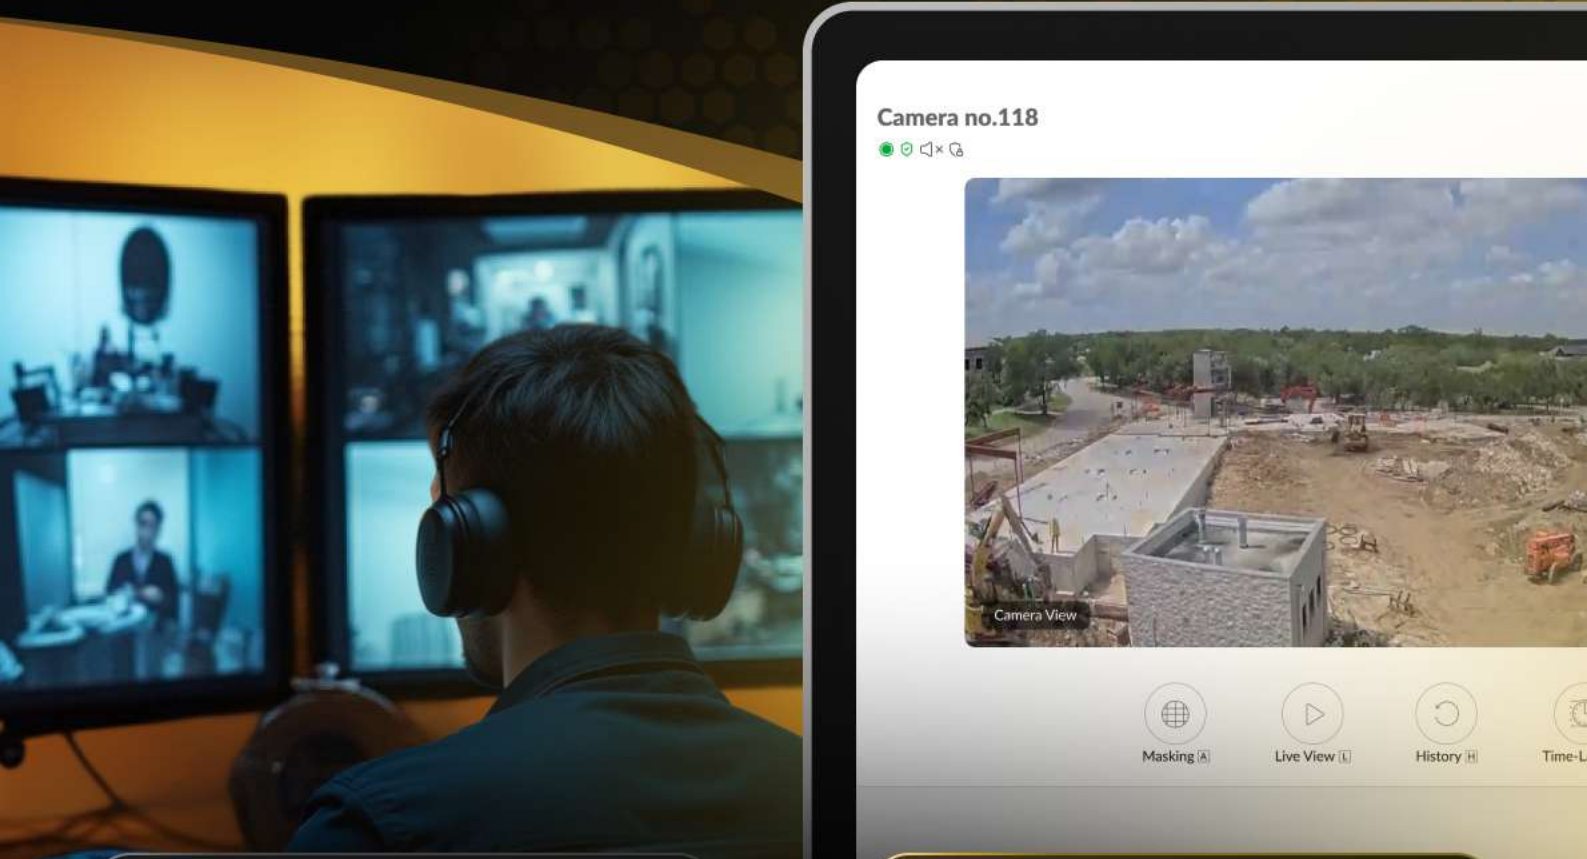
NXGEN Technology AG

PulseView

High quality timelapse videos using existing surveillance feeds and alarms.



BEFORE GCXONE

Professional timelapse setups cost €6K–€20K+ in hardware, integration, and editing before deployment.

WITH GCXONE

Timelapse video is created in seconds. Operators and admins save hours, IT avoids requests, and managers cut costs while gaining instant visibility.

What's **Special?**

Introducing **Pulse**View – the effortless way to transform your surveillance footage into impactful time-lapse videos.

Leveraging your existing security infrastructure, **Pulse**View automatically generates and delivers high-quality visual summaries that highlight key activity over time, without any manual effort.

Turn Footage Into Insight. Instantly.

Whether for reporting, marketing, or operational review, **Pulse**View brings clarity and context to your video data.

It saves hours of manual review by generating high-quality timelapse video within seconds, enhancing communication and delivering professional-grade results — all automated and ready to use.

With PulseView, your security system becomes a powerful tool for instant insight.

KEY FEATURE

- Offers automated generation and delivery of high-quality time-lapse videos from surveillance feeds using existing security infrastructure.

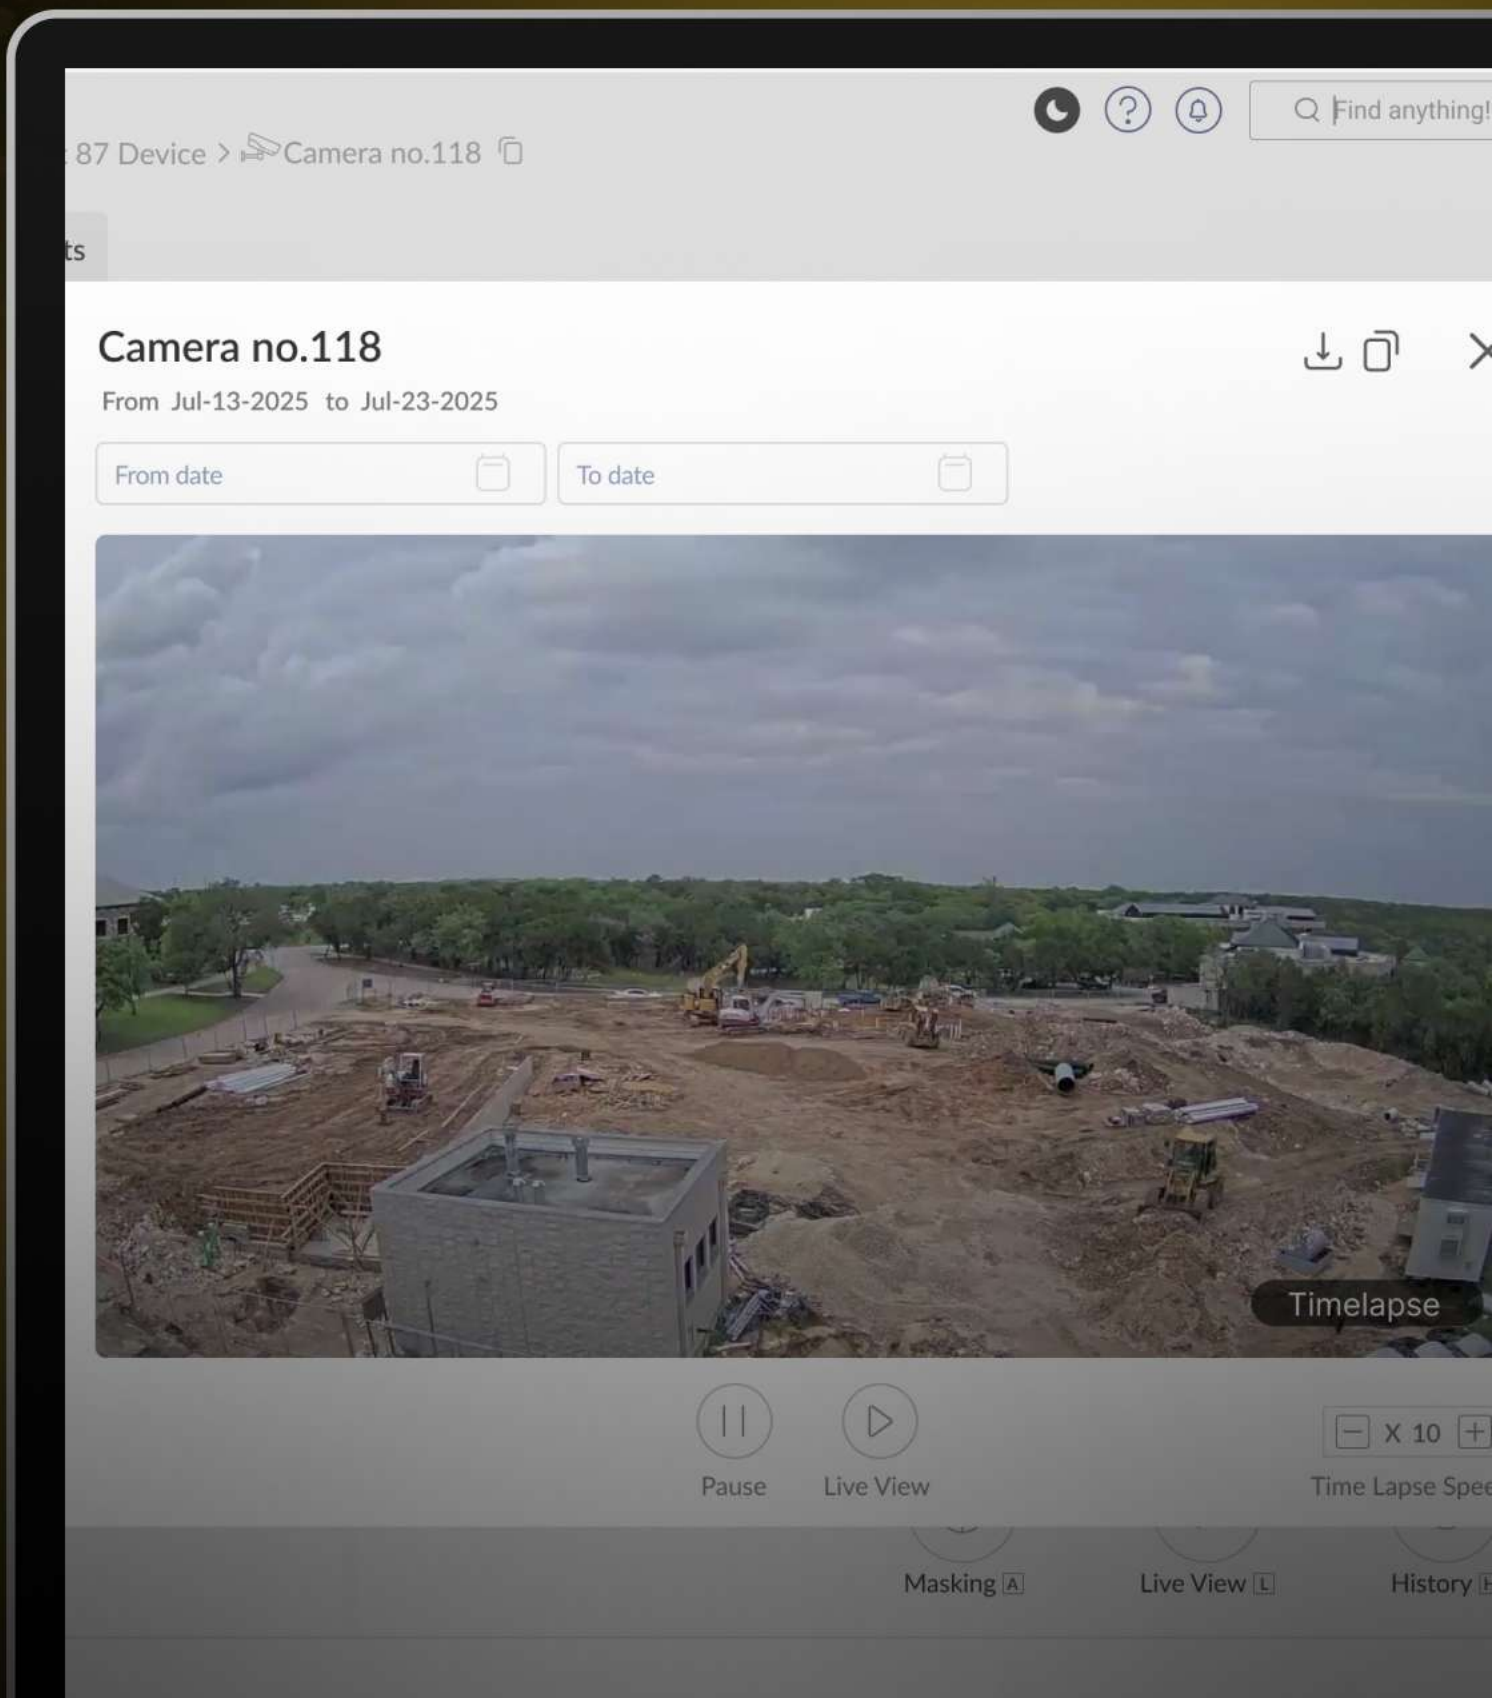
Powering Your Success

PulseView

95% FASTER DECISION MAKING

The Breakthrough

PulseView transforms insights into pure margin. Administrators can launch services on demand, operators benefit from tools that expand capability without complexity, and IT reduces manual effort during activations. For General Managers and Sales leaders, **Pulse**View delivers measurable impact — doubling revenue per site while cutting workload by 60%. Proof that speed and scale can go hand in hand.



PulseView + **Genie**: Instant Growth, Zero Friction

Genie and **Pulse**View make video insight instant. **Genie** automates requests while **Pulse**View creates high-quality timelapse video within seconds, giving operators clarity, admins speed, IT fewer tickets, and managers immediate visibility.

How does **Pulse**View enable faster tower deployments?

With **Pulse**View, teams can deploy towers three times faster using the same workforce. This leads to reduced downtime and expanded coverage, all without increasing labor costs.
