ZenMode

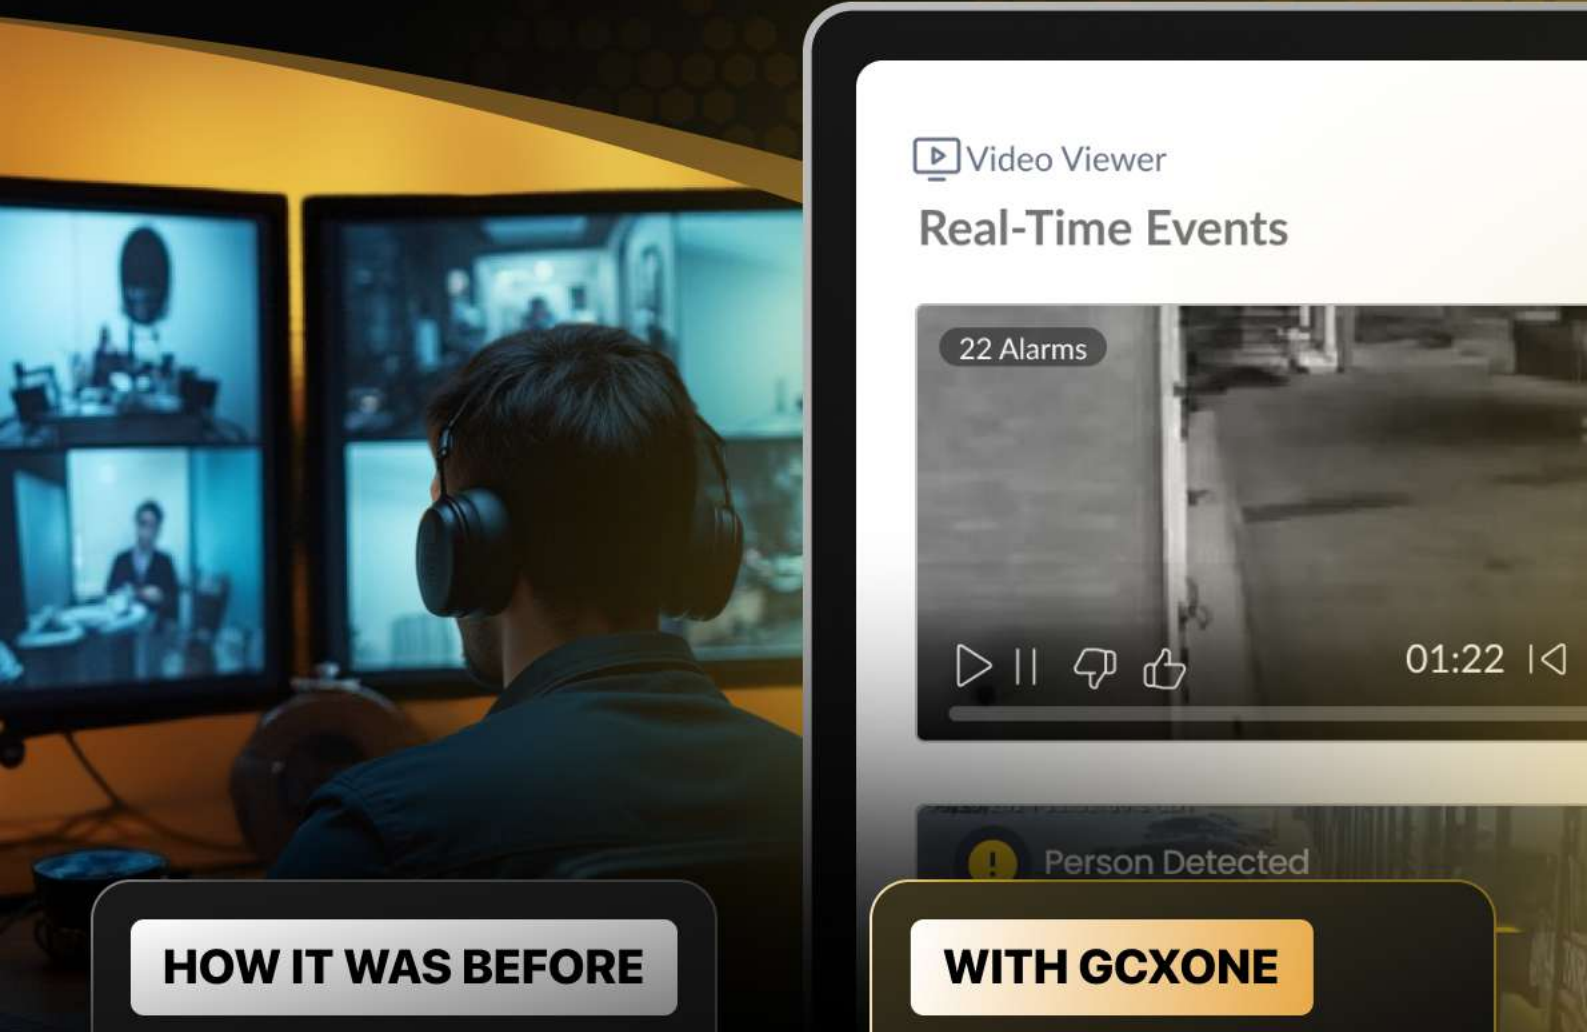
Shift to True Calm; Silence Noise, Maximize Focus



HOW IT WAS BEFORE

Endless alerts, repeated noise, and operator fatigue slowed response and limited growth.

WITH GCXONE

Critical alarms surface instantly. Operators respond in seconds, admins work 3× faster, and managers boost capacity — each operator handling 200+ more cameras with 10% higher productivity.

A Game Changer

With ZenMode, capacity grows without extra hires. Operators process multiple alarms in seconds, administrators triage signals 3× faster, and General Managers unlock up to 10% more productivity per shift. Each operator now manages 200+ additional cameras, turning efficiency into measurable growth.

Streamline Response. Maximize Value.

ZenMode doesn't just improve speed – it drives real business impact. By enhancing operator efficiency, it unlocks up to €10,000 in monthly savings through smarter, faster alarm resolution.

Designed to reduce cognitive load and operational drag, **Zen**Mode transforms high-volume monitoring into a streamlined, high-performance process.

KEY FEATURES

- Additional 200+ cameras/operator/shift
- Alarm Handling, ~2x increased handling
- Workflow alarm handling would be reduced to ~2-3 Minutes
- Revenue potential of up to €10K savings per month

Powering Your Success

ZenMode

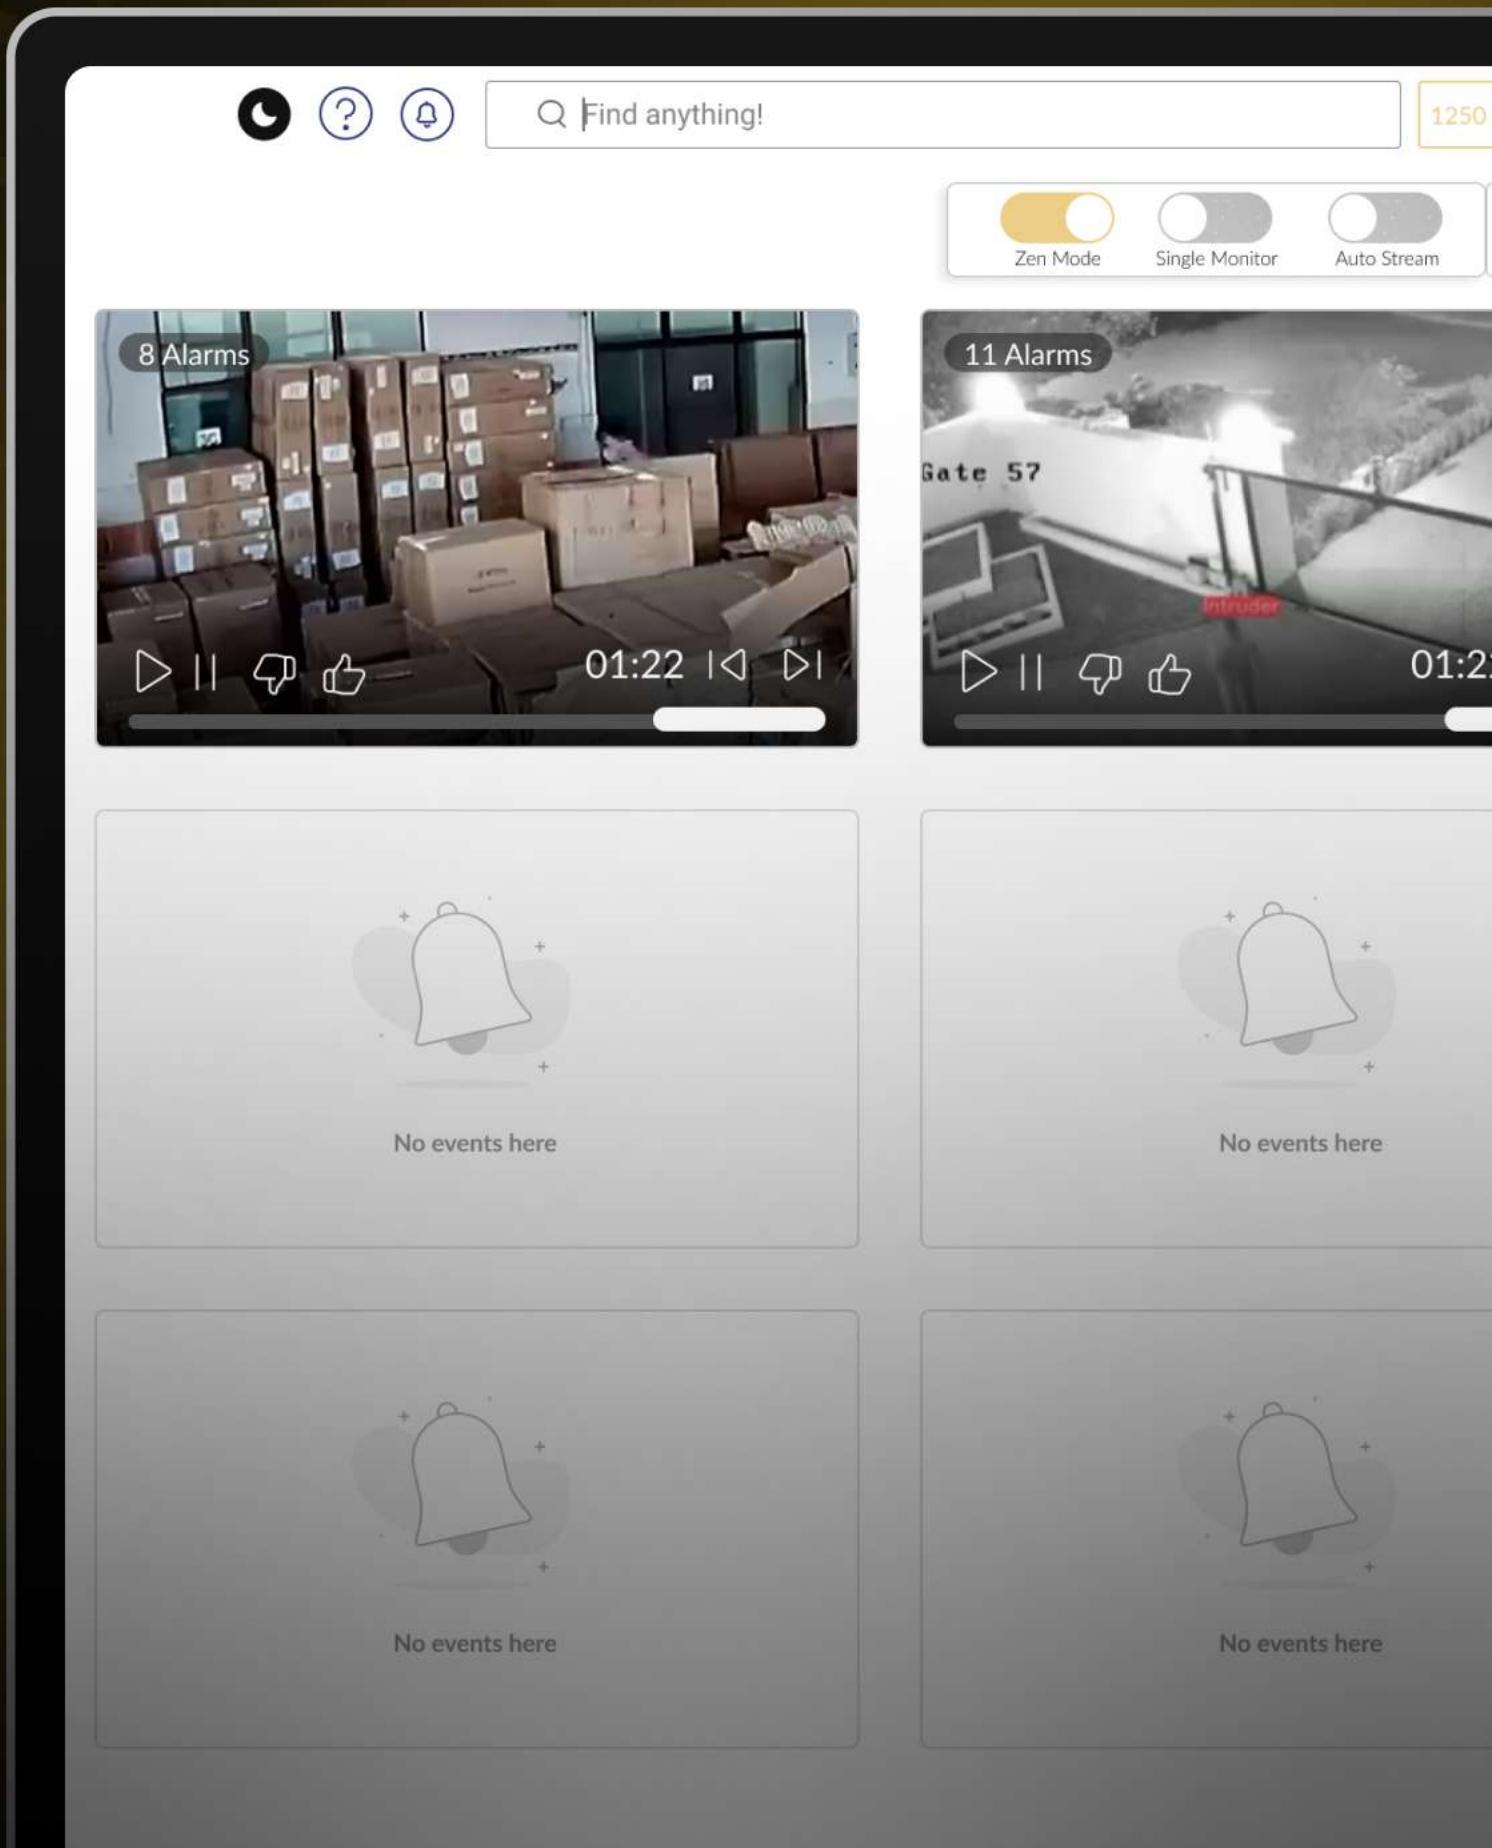
BOOST OPERATOR CAPACITY BY **10%**

UP TO **3x** FASTER ALARM IDENTIFICATION

MANAGE UP TO MORE **200+** CAMERAS WITHOUT FATIGUE

The Breakthrough

ZenMode ends alert overload. By filtering noise and surfacing only critical alarms, it creates calm, focused operators who respond faster, make fewer mistakes, and stay sharp through the shift.



How your **Genie** Co-pilot works with **Zen**Mode ?

With guided fixes, **Genie** resolves distractions at double the speed, automating routine queries to save 1–2 hours daily. It cuts support volume by 50–70%, ensuring operators remain focused on real threats. This streamlined approach enhances overall productivity, allowing teams to work more efficiently and effectively in their roles.

How efficiently can we utilize **Zen**Mode to manage alarm notifications?

With **Zen**Mode, operators can filter out up to 60% of low-priority alarms, enabling them to respond more swiftly and concentrate on genuine threats. This streamlined approach allows teams to enhance their focus and efficiency without being bogged down by unnecessary alerts.
