Add a Device to GCXONE

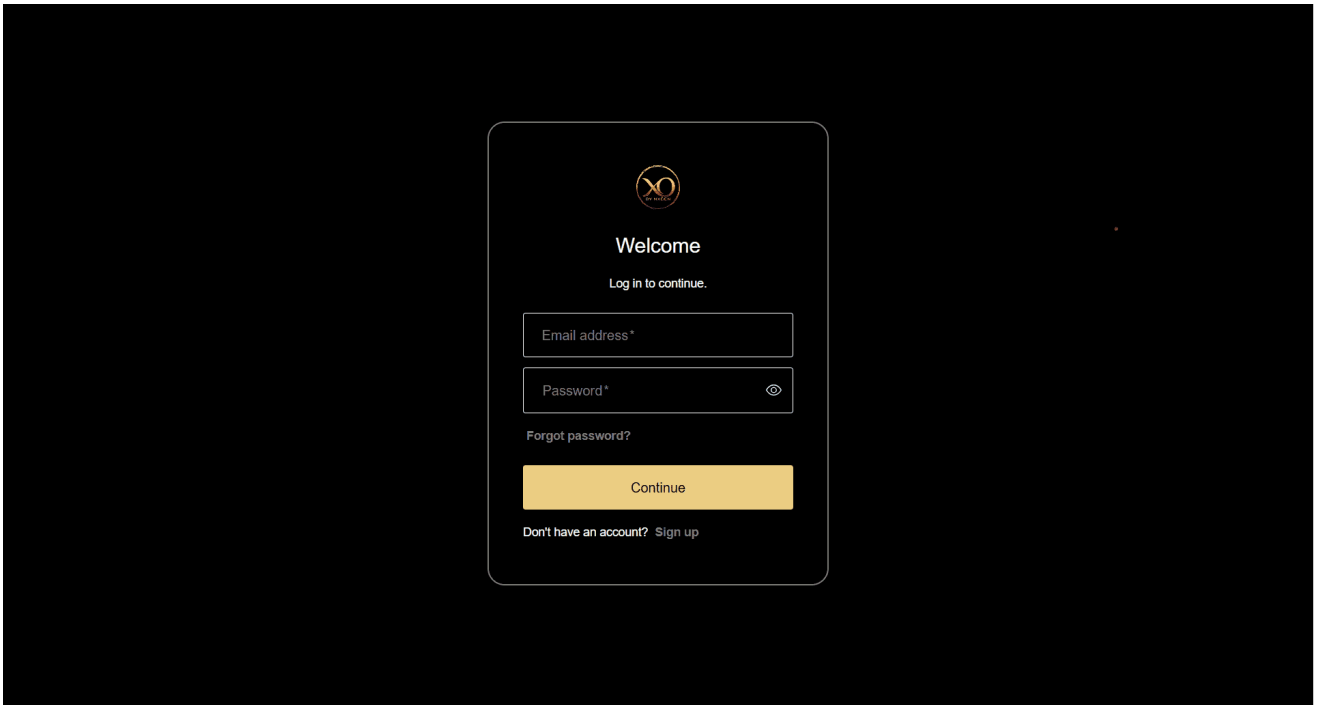
Add a Device to GCXONE

Overview

This guide explains how to add a device to the GCXONE platform.
Before adding a device, you must create a **Customer** and a **Site** where the device will be assigned.

Step 1 — Log in to GCXONE

1. Log in to the **GCXONE platform** using your account credentials.

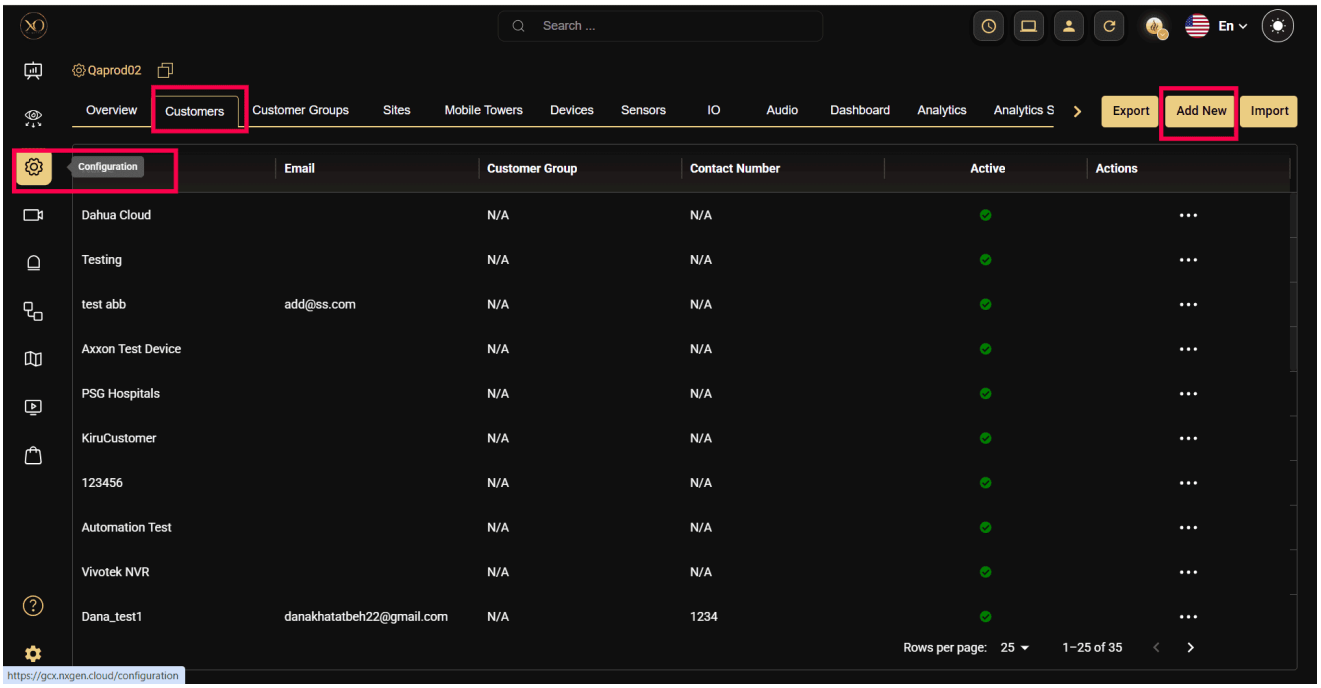


Step 2 — Create a Customer

2. Navigate to **Configuration**.

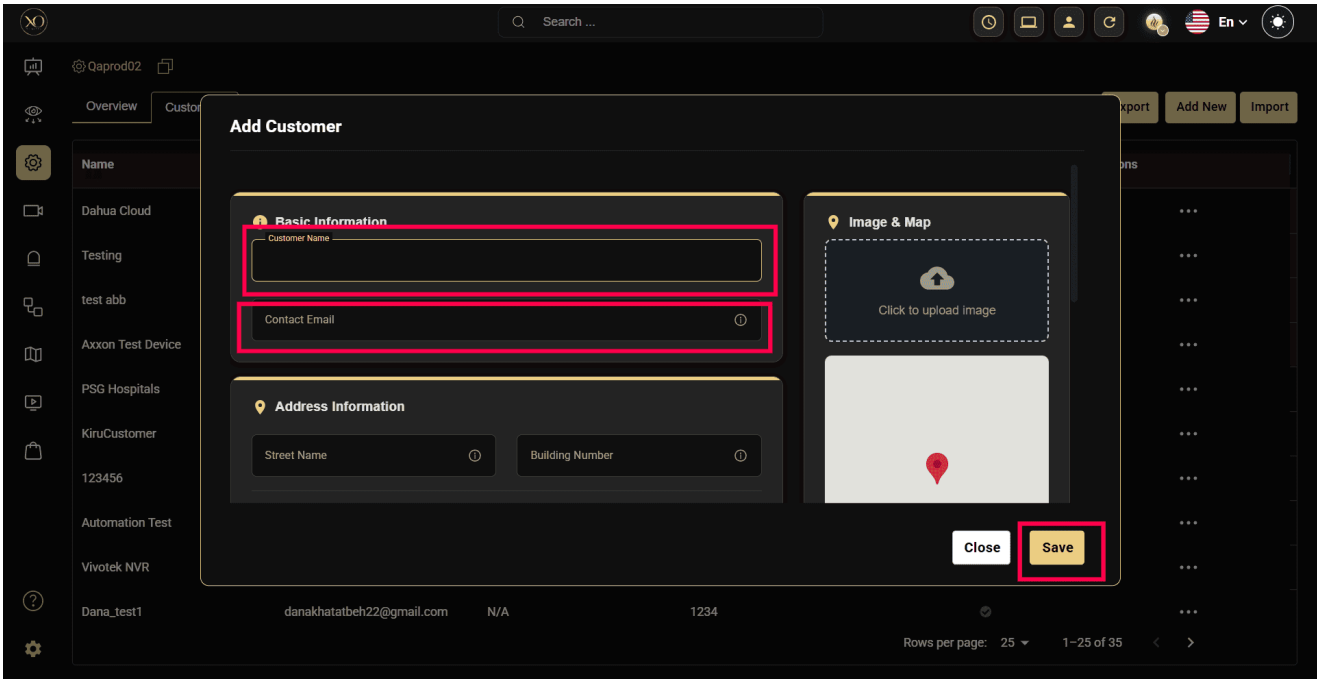
3. At the **Service Provider** level, select **Customers**.

4. Click **Add**.



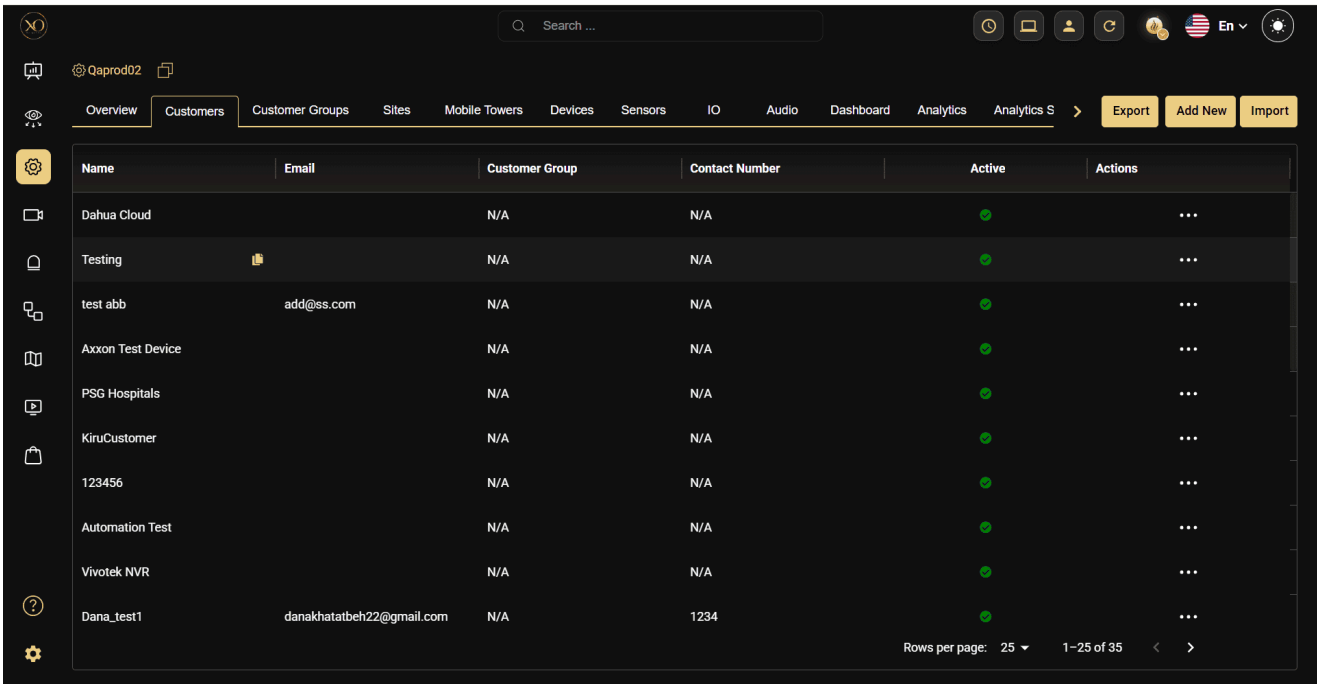
5. Enter the required customer information.

6. Click **Save**.

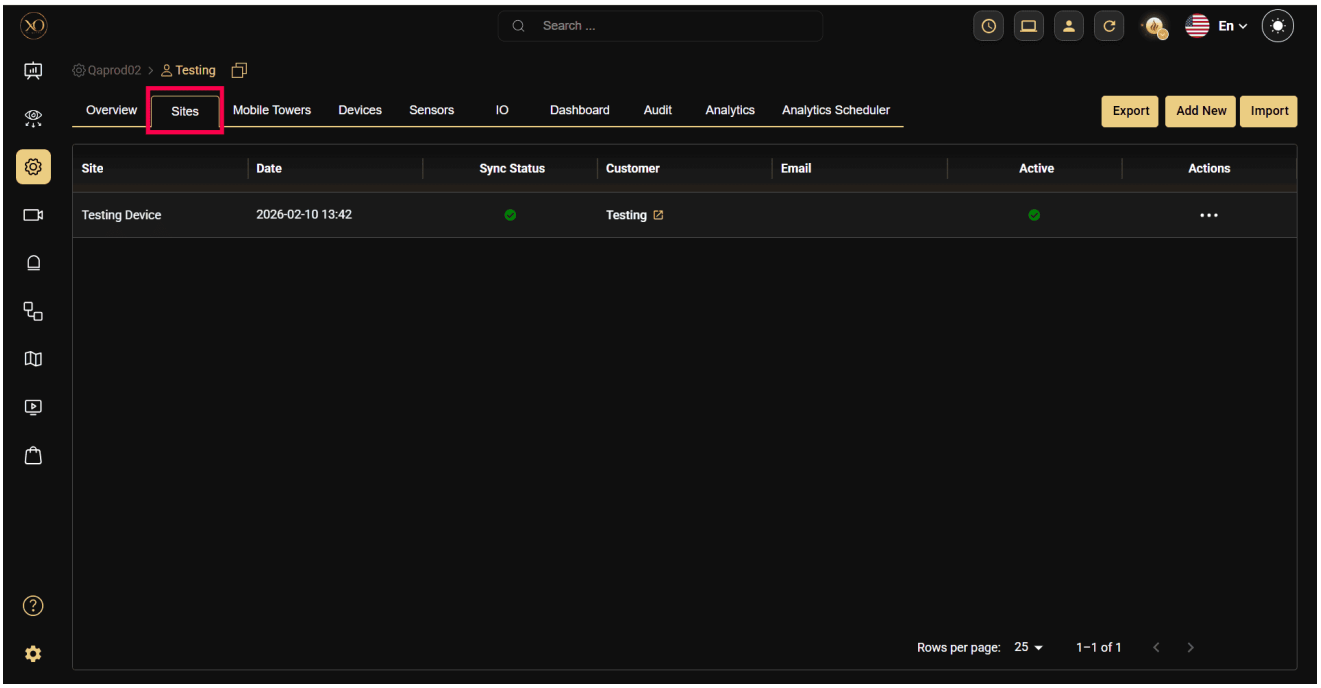


Step 3 — Create a Site

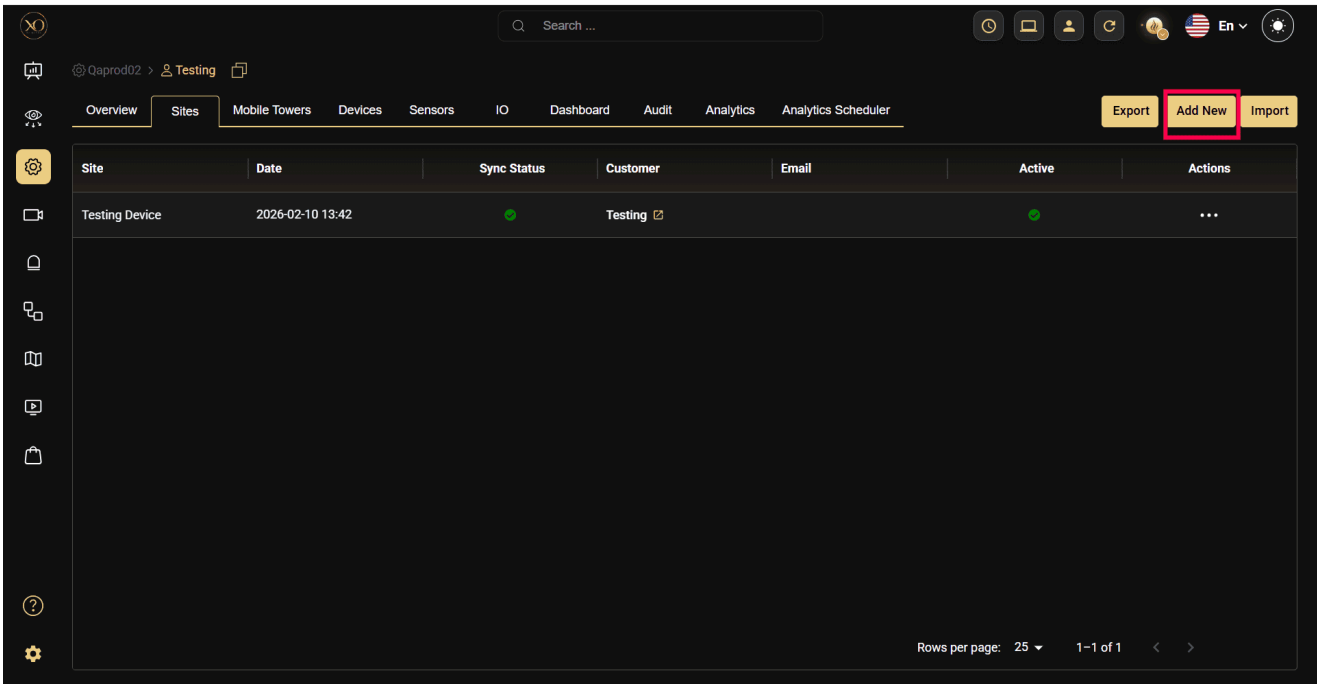
7. Select the newly created **Customer**.



8. Open the **Sites** tab.

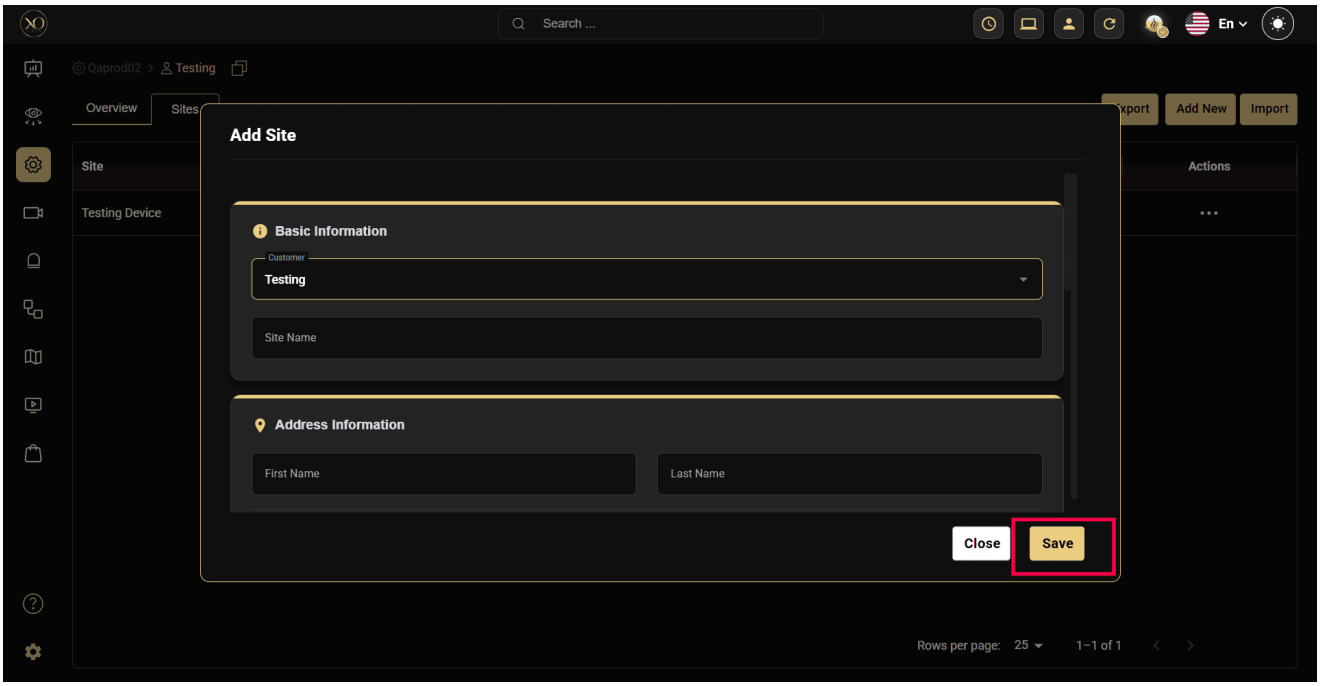


9. Click **Add**.



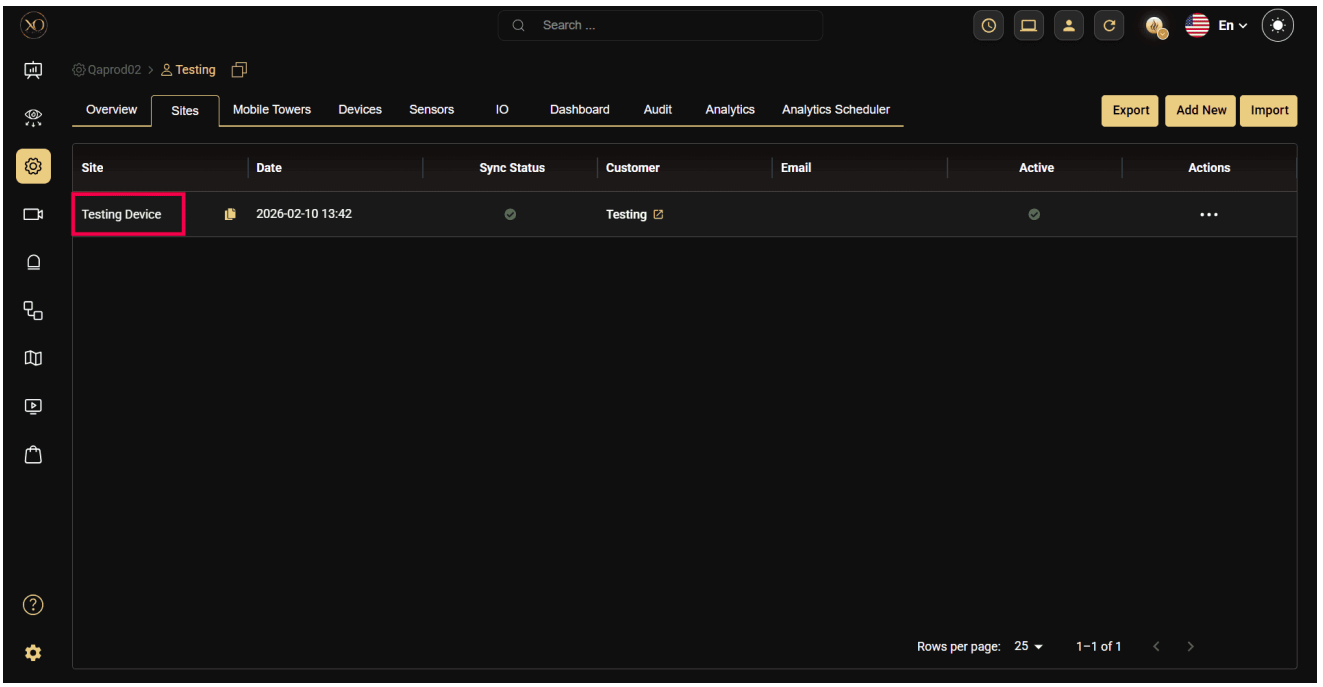
10. Enter the required site information.

11. Click **Save**.

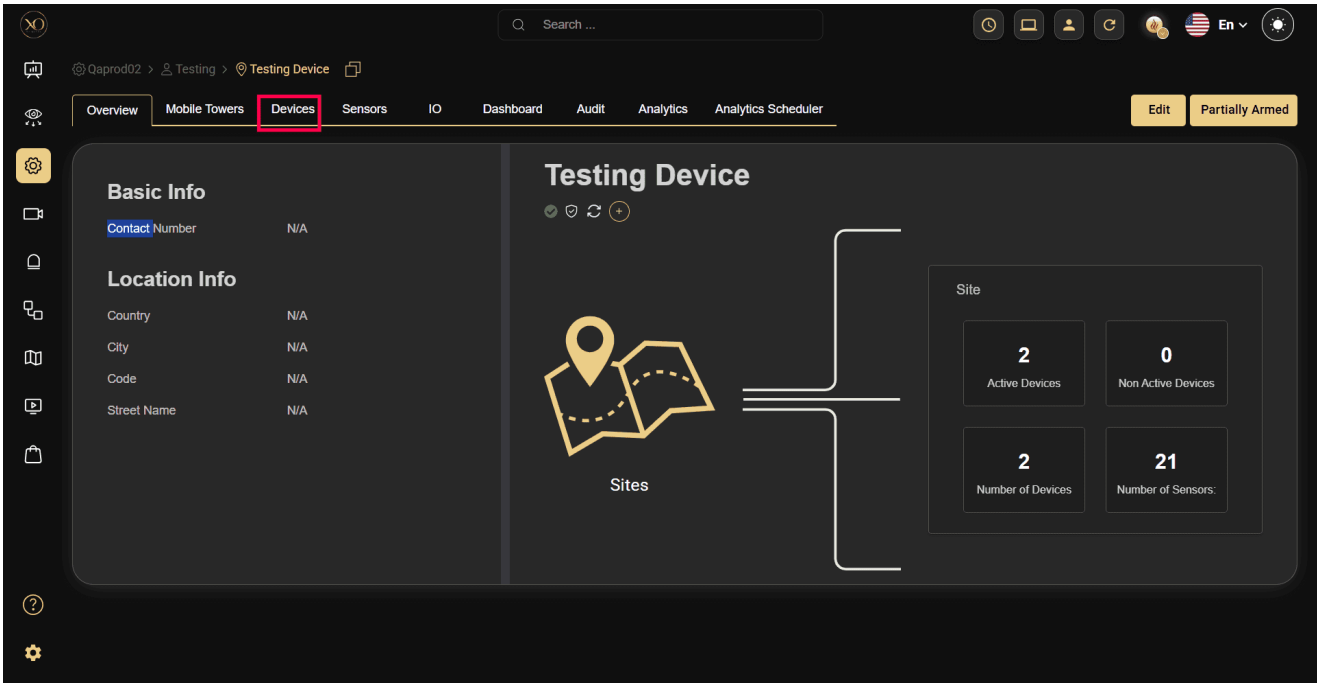


Step 4 — Add a Device

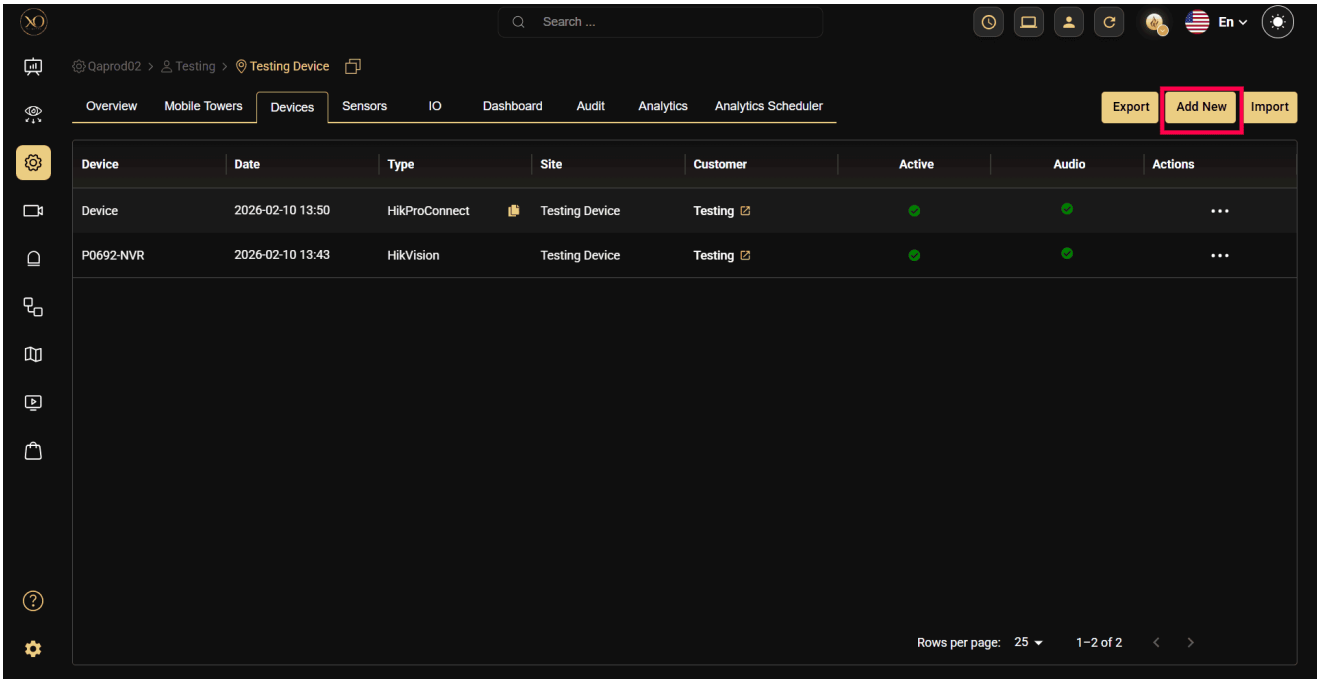
12. Select the newly created **Site**.



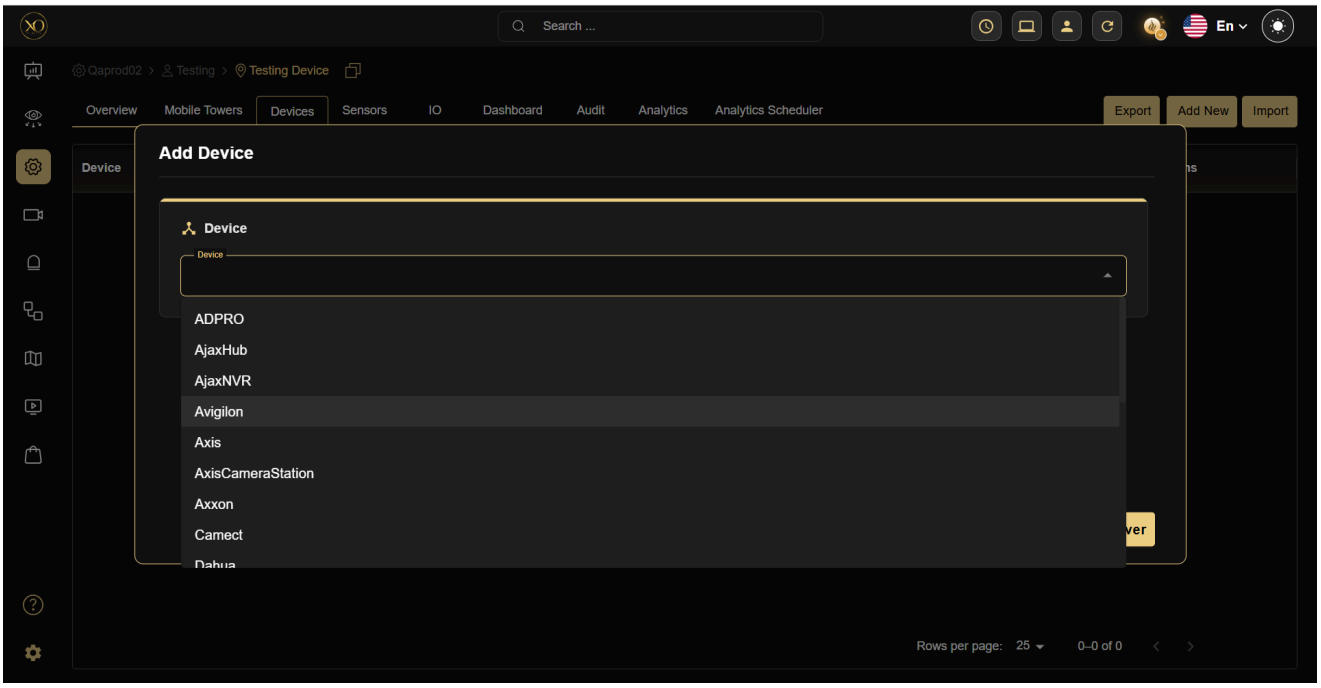
13. Navigate to the **Devices** tab.



14. Click **Add**.



15. The **Add Device** dialog will appear.



In the **Add Device** dialog:

- Select the **device type or integration**
- Enter the required **device configuration details**
- Provide network or authentication information if required

16. Click **Save** to register the device.

Result

After saving, the device will appear in the **Devices list** for the selected site.
The platform will begin monitoring the device and processing events generated by it.
